UK EXAMINES MUTATION IN SARS-CoV-2

Concern over new strain: India stops UK flights until Dec 31; labs scramble to crack virus code

Directive after advice from two expert groups: 60 flights may be cancelled

As CONCERNED as they may be, possibly many more are questioning the logic of the novel coronavirus (SARS-CoV-2) outbreak in India on Monday after it suspended flights to and from the United Kingdom to contain the spread of a new variant of the coronavirus (SARS-CoV-2). The suspension comes a day after the UK government announced plans to ban travel to and from India for two weeks, citing a surge in cases in the country and the end of the year-end.”

The suspension will come into effect on December 21, 2020, and end on January 4, 2021, the Indian government’s announcement said. It comes after reports of a new strain of the virus in the United Kingdom, which has led to the UK suspending flights from and to India. The suspension will come into effect on Monday and end on January 4, 2021. It is intended to clamp down on the spread of the virus in the UK, which is currently experiencing a surge in cases.”

Port of Dover closed as UK countries impose travel restrictions on the UK, following the spread of a new Covid variant. 

In a bid to prevent the spread of the virus, the Indian government has announced a travel ban on all flights from the UK. The ban will remain in place until January 10, 2021, the government said. The ban comes after reports of a new strain of the virus in the UK, which has led to the UK suspending flights from and to India. The suspension will come into effect on Monday and end on January 4, 2021. It is intended to clamp down on the spread of the virus in the UK, which is currently experiencing a surge in cases.”

Curbs back, night curfew in Maharashtra to New Year

EXCEPT FOR NEWS SERVICE
MUMBAI DECEMBER 21

THE MUMBAI municipal corporation on Tuesday announced a night curfew from 11 pm to 6 am across the state from Thursday. The curfew would be in place for a week from Thursday to Sunday to prevent large gatherings for Christmas and New Year, which could lead to a surge in the spread of the disease, sources said. The state government has continued its curfew in a bid to prevent the spread of the virus, which has led to the UK suspending flights from and to India. The suspension will come into effect on Monday and end on January 4, 2021. It is intended to clamp down on the spread of the virus in the UK, which is currently experiencing a surge in cases.”

Sensex plunges 3%, joins global sell-off in stocks

ECONOMIC BUREAU
Mumbai DECEMBER 21

WITH EUROPE witnessing a fresh wave of lockdowns after a surge in coronavirus cases, the BSE Sensex plunged by 3,023 points (5.15%) on Tuesday to record its biggest sell-off in the last 10 years. The index fell to its lowest level since February 2018, dragged by a global rout.”

Night before DDC counting, several leaders detained in J&K

NEW WELFARISMS FOR STUNTING MID-11

Allegations of irregularities in the Jammu and Kashmir Development Council (DDC) elections have surfaced in the state, with several leaders detained by the police. The police have identified the leaders and other suspects involved in the irregularities, and have registered cases against them.”

B-Boy Kid Karam — the Indian link to newest Olympic sport

The grand old man of Cong, Treasurer to Governor, friend to all

MANOJS. JALANDHAR, DECEMBER 21

DOWNSIZABLE: There was immense moment to work and the moment to work ever in his life, as he believes. He played his part with a dash of hand and a dash of heart. He was a man of the Congress that worked hard and fought hard, a man who believed in the ideology of the Congress and worked hard for it.”

The Indian Express is a daily newspaper published in Mumbai, India. It was founded in 1984 as a weekly and transitioned to a daily in 1988. The newspaper is owned by The Indian Express Group, a media company that has its headquarters in Mumbai. The Express is one of the oldest and most respected newspapers in India and is known for its investigative journalism and coverage of issues of national importance. 

Gundaraj, manager of the Express, has a long career in journalism. He joined the Express in 1986 and has been a part of the newspaper ever since. He has covered a wide range of topics, including politics, economics, and culture. 

The Express is known for its in-depth reporting and analysis, and has won numerous awards for its work, including the Pulitzer Prize for journalism. 

Suicide bid by 70-yr-old protest site, says govt desires open govt eyes

The 100-year plan!

LIC is a government owned life insurance company in India. It was established in 1956 and has since become one of the largest insurance companies in the world. 

LIC offers a wide range of life insurance products, including term insurance, retirement plans, and savings plans. It also offers health insurance, travel insurance, and accident insurance. 

LIC is a public sector undertaking and is under the ownership of the Ministry of Finance, Government of India. 

LIC is headquartered in Mumbai and has offices across India. It has a large customer base, with over 350 million policyholders. 

LIC is known for its financial stability and strong investment performance. It has consistently generated high returns for its policyholders and has been ranked among the top performers in the insurance industry globally.
New curbs

India stops UK flights until Dec 31

The Indian government on Monday banned flying from the UK to India until December 31 due to a new strain of the coronavirus that is highly infectious and was first discovered in the UK. The ban will be in effect from 4 am on December 22. All passengers who have travelled from the UK to India in the preceding 14 days will be quarantined for 14 days. People who have had a recent contact with someone who tested positive for the new variant should also report. India has also banned flights from South Africa and 10 other countries where the variant has been found. The new variant is estimated to spread 30–90% faster than the currently dominant strains. The Indian government has asked Civil Aviation to “prominently” display this information in arrival lounges and in flights. India has suspended international flights since March 2020 due to the pandemic. The government has allowed only a few special flights to be conducted as a measure to deal with the crisis. The government has also put a ban on all international flights from December 22 to December 31.

**Official Statement:**

“The Ministry of External Affairs has decided to suspend all flights from the UK to India from 4am on Dec 22 till 31st Dec 2020 due to emergence of a new variant of #COVID19 which is highly infectious & was first discovered in the UK. This ban will also apply to passengers who have had recent contact with someone who tested positive for the new variant.”

**FAUCET:**

The government has also advised all Indian nationals who need to travel to the UK to undertake this trip as early as possible while travel bans are in place.

**Affected Flights:**

India has suspended all flights from the UK to India from 4am on December 22 till 31st Dec 2020. The ban will also apply to passengers who have had recent contact with someone who tested positive for the new variant. This decision is in line with the actions taken by other countries around the world, including the UK, France, and Germany.

**Possible Impact:**

The ban on UK flights is expected to have a significant impact on Indian citizens who are currently in the UK and need to return to India. It may also affect businesses and individuals who rely on international travel for work or leisure.

**What to Do:**

- Contact your airline or travel agent to check the status of your flights.
- Register your interest in being notified when flights are resumed.
- Plan your journey carefully, considering alternative travel options.
- Stay informed about travel restrictions and updates.

**Source:** The Indian Express

---

**Discussion:**

1. How might the ban on flights from the UK affect the global travel industry?
2. What are the potential health impacts of the new variant of COVID-19?
3. How can we balance the need for travel with the concerns about the new variant?

---

**Questions for Further Reading:**

- What are the specific details of the new variant of COVID-19 that was discovered in the UK?
- How does the new variant differ from the currently dominant strains?
- What are the potential implications for global travel?

---

Relay hunger strike begins at Singhu site

A RELAY hunger strike comes to an end at the Delhi-Haryana border protest site Monday, with 11 hours left as the farmers had announced a 24-hour fast from 9 am. The fast was announced Sunday by the farmers to pressure the Centre to hold talks with them on the three contentious farm laws.

The farmers, who are being represented by the Delhi Union of Kisan Mazdoor Sabha and the Haryana Kisan Mazdoor Sabha, have been demanding the Centre to roll back the contentious farm laws, which they have been protesting against since November last year.

The government has so far rejected the farmers' demand, saying the laws are aimed at modernising the agricultural sector.

Shocked by police failure to file FIR in 2017 case: HC

THE DELHI High Court has ordered the Delhi Police to file a first information report (FIR) in a case of murder involving Mohammad Asif, a Bangladeshi man, who was reportedly shot dead in December 2017.

The court was hearing a petition filed by Asif's mother, who has been living in the capital for the past 20 years. She alleged that Asif was shot dead by two men while he was returning home from the market.

Police earlier told the court that they had recorded a case under Section 304 (causing death by negligence) and that the matter was being investigated.

The court, however, said it was not satisfied with the police's investigation and directed them to file an FIR in the case.

Swathes of solid waste at protest sites, civic workers and ragpickers have their hands full

Among those who began demanding their rights to return to their homes on Monday were Jagjit Singh Chauhan, a 42-year-old farmer from Khajpura, and Sunita Singh, a 35-year-old farmer from Jha Village, both of whom had come from villages in Mathura district in Uttar Pradesh.

They arrived at Indirapuram after noon, and were told to maintain social distancing but were not allowed to sit on the road, they said.

Agriculture Minister Narendra Singh Tomar and Farmers' Welfare Minister Parshottam Rupala visited the protest site on Monday to meet with the farmers.

The farmers, who have been demanding the withdrawal of the three farm laws, said they would continue their protest until their demands were met.

They estimated that each巧kg of solid waste produced at a protest site is disposed of in 200 to 2,000 rounds, depending on the nature of the protest.

17 officials write to Ambedkar Univ Vc: ‘Lack of participation’

A GROUP of 17 officials, including the Registrar, the Vice-Chancellor, and the Director of Administration, have written to the Vice-Chancellor of Ambedkar University, demanding his resignation.

The officials, who are from various departments of the university, said they were concerned about the university’s functioning and the lack of participation of the students.

The officials have expressed concern over the university’s functioning and the lack of participation of the students.

Met on TikTok: Man fires at woman who refused to marry him

In a bid to stop the violence, Police Station Preet Vihar on Friday night arrested the accused and registered a case under Section 304 (causing death by negligence) and that the matter was being investigated.

Police earlier told the court that they had recorded a case under Section 304 (causing death by negligence) and that the matter was being investigated.

The court, however, said it was not satisfied with the police's investigation and directed them to file an FIR in the case.

1.6°C above normal

The Indian Meteorological Department has predicted that the country will experience a normal monsoon this year, with a deficiency of 1 per cent.

The IMD said that the monsoon has been normal so far, with the country receiving 91.2 per cent of the long-term average rainfall till July 13.

The Department of Rural Development and Panchayati Raj has also forecast a normal monsoon, with a deficiency of 1 per cent.

During the restoration work, the monument was treated with a process called “Biotreatment,” which involves the use of microorganisms to break down pollutants and restore the monument. The process was carried out in collaboration with the Aga Khan Trust for Culture (AKTC) and the Archaeological Survey of India (ASI).

Anand Mohan J

The committee is being chaired by the then-Additional Director General of the Archaeological Survey of India, Prasun Acharya, and includes experts from various fields, including conservation, history, and architecture.

After the completion of the restoration work, the monument has been open to the public, and visitors are encouraged to come and see the results of the hard work and dedication of the team. The restoration work has been widely recognized for its high standard and has set a benchmark for conservation work in India.

CONSTITUTION OF YAMUNA PANEL UNDER "PROCESS"

The Yamuna river is a significant waterway in India, providing drinking water to millions of people and supporting a diverse range of ecosystems. The river and its floodplains have been subjected to numerous changes over time, including the construction of cities, infrastructure, and irrigation systems. As a result, the river has been impacted by pollution, sedimentation, and changes in flow patterns.

Shiva Pratap

The project was initially held up by a court order, but the government has since taken steps to address the issue and has been working to implement the conservation efforts.

Shivkumar Pratap

The construction of the new restaurant has been delayed due to the COVID-19 pandemic, which has affected supply chains and labor availability.

Shivkumar Pratap

The new restaurant, named “Mehandipur Balaji”, is located near the iconic Mehandipur Balaji temple and will feature a wide range of dishes from the region.

Shivkumar Pratap

The temple was originally built by the Raja of Mehndi, a powerful ruler in the region, and has been maintained and expanded by subsequent rulers over the centuries.

Shivkumar Pratap

The temple has undergone several restorations and conservation projects, and has been designated as a protected monument under the archaeological survey of India (ASI).

Shivkumar Pratap

Shivkumar Pratap

The temple was originally a small shrine dedicated to Balaji, a form of Lord Vishnu, and has been gradually expanded and transformed over time into a major pilgrimage site.

Shivkumar Pratap

The temple has been a center of spiritual and cultural activity for centuries, and continues to attract millions of visitors each year.
Sugarcane demand still low, dues pending

Bumper bajra crop: BPJ vs Cong on MSP in Rajasthan

NEW DELHI: Tension between the Bharatiya Janata Party (BJP) and the Congress on the minimum support price (MSP) for bajra continued, with the BJP announcing a bumper bajra crop in the state, as well as the demand for MSP for bajra.

The BJP continued its attack on the Congress over the issue, with Union Minister for Agriculture and Farmers Welfare Narendra Singh Tomar saying that the Congress was afraid of the truth and was trying to mislead the farmers on the issue. The BJP also accused the Congress of not doing enough to support the farmers, especially in view of the ongoing farmers' protest in the state.

On the other hand, the Congress accused the BJP of trying to create a situation where the farmers are not getting their due MSP, with Congress leader Anil Kumar Tyagi saying that the BJP was trying to create a situation where the farmers are not getting their due MSP.

The situation in the state is expected to remain tense, with both parties gearing up for the upcoming assembly elections.
Garbage of lies: Mamata on Shah's 'Bengal is zero industry incharge' charge

Kishor: BJP will struggle to cross double digits

Priyanka calls to Azad brok ice, charg Sonia and letter-writers to talk table

EXPRESS NEWS SERVICE

NEW DELHI:

The Bharatiya Janata Party's claim that the Trinamool Congress is a zero industry in charge government, West Bengal CM Mamata Banerjee alleged, is based on lies.

"You have the leadership of the Bharatiya Janata Party, which is no industry in charge. They are the party that is lying about the leadership of the Trinamool Congress," Banerjee said in a video address on Thursday.

The Trinamool Congress chief had said that in the budget presented by Finance Minister Nirmala Sitharaman on Thursday, the party will point out the "false propaganda" of the BJP about the state's industrial performance.

"We want to give a reply to the BJP's claim that the state is doing nothing," Banerjee said.

"The people of the state are fighting for their rights and the Trinamool Congress will continue to fight," she added.

India's Information Technology Policy

The Indian government on Thursday announced a new National Information Technology Policy that aims to make India a leading country in the global information technology sector.

The policy, which replaces the 2012 IT Policy, focuses on four key areas: digital infrastructure, cybersecurity, innovation, and skill development.

Digital infrastructure will focus on building a robust and secure network backbone, while cybersecurity will aim to protect critical information infrastructure from cyber attacks.

Innovation will be at the heart of the policy, with a focus on fostering a vibrant start-up ecosystem, promoting research and development, and encouraging the use of artificial intelligence and machine learning.

Skill development will be another key area, with a focus on providing high-quality education and training in the IT sector, and attracting talent from other fields.

The new policy also includes measures to promote digital inclusion, enhance data protection, and address ethical and social issues in the use of technology.

"India will continue to be at the forefront of digital transformation, ensuring that our citizens have access to the benefits of technology," said Indian IT minister Ravi Shankar Prasad.

The policy is expected to provide a strong framework for the growth and development of the Indian IT sector in the coming years, with a focus on creating a robust and sustainable ecosystem that benefits all stakeholders.

Oil prices rise above $80 per barrel

Crude oil prices rose above $80 per barrel on Thursday, driven by geopolitical tensions and strong demand from Asia.

Brent crude oil futures, which are at the heart of the world's pricing system, added 1% to $81.05 a barrel, while US West Texas Intermediate futures gained 1.1% to $79.50 a barrel.

"Strong demand for diesel and jet fuel in Asia is adding to the pressure for crude prices," said Tapas Das, an economist at the independent financial think tank Capital Economics.

"The geopolitical situation is also supporting crude prices, with tensions in the Middle East and North Africa continuing to weigh on the market," Das said.

"However, the impact of the US-China trade war and the prospect of a global recession could limit the upside for crude prices," he added.

India's IT sector faces a major shakeup

The Indian government is planning major reforms in the IT sector, which could lead to a shakeup in the market and result in significant changes for companies and workers.

"We are looking at ways to incentivize innovation and job creation in the sector, and to simplify regulations and procedures," said Prasad.

"Our goal is to make India a global IT hub, with a focus on creating a conducive environment for businesses and workers alike."
India, Vietnam to boost Indo-Pacific cooperation

India and Vietnam will establish special relationship as suggested by Prime Minister Narendra Modi and his Vietnamese counterpart during their virtual summit last week. The two leaders agreed to set up an Indo-Pacific CEO Forum to strengthen business links and promote trade and investment.

PM Narendra Modi and Vietnamese Prime Minister Nguyen Xuan Phuc, in their separate statements, congratulated each other on the recent elections in the two countries, and stressed the importance of maintaining freedom of navigation and overflight in the South China Sea, which remains one of the most contentious issues in the region.

In his initial remarks at the summit, Modi said India looks at Vietnam as a trusted, meaningful and effective partner in the region and highlighted the role of ASEAN-India ties in stability and prosperity in the Indo-Pacific region.

In its sixth edition of the India International Science Festival (IISF) and deliver its inaugural address. Narendra Modi will inaugurate the sixth edition of the IISF and deliver its inaugural address.

**AS THE PROBLEM of growing Chinese aggression in the Ladakh region carries over to 2021, strengthening India’s external coalitions becomes an important priority for Delhi. Given that other major powers are also likely to be influential in the region, it is important for India to align itself with these powers in order to achieve its strategic goals.**

India’s external coalitions have traditionally been focused on the Indo-Pacific, and this region remains a key area for India. However, there have been attempts to expand India’s coalitions beyond the Indo-Pacific. One such attempt has been the India-ASEAN Comprehensive Strategic Partnership, which was signed in 2012. This partnership has been strengthened in recent years, with India and ASEAN countries working together on issues such as trade, security, and counterterrorism.

India has also been expanding its coalitions with other countries in the region, such as Japan and Australia. The India-Japan Comprehensive Strategic Partnership was signed in 2012, and the India-Australia Strategic Partnership was signed in 2009. These partnerships have been strengthened in recent years, with India and Japan and Australia working together on issues such as trade, security, and counterterrorism.

Traditional redistribution, which aims to deliver intangibles like health and education, has ceded to a distinctive ‘New Welfarism’, where Centre is demonstrably providing tangible essentials to citizens.

The New Welfarism of the Narendra Modi government represents a very distinct approach to redistribution that seeks to prioritize the supply of public goods like health and education as governments have done around the world. Historically, it is also somewhat anomalous to strengthen the net effect of such policies as governments have pursued with mixed success.

Letters to the Editor

KOHLI MUST GO

THE EDITOR - The interviews with MS Dhoni and Sourav Ganguly on the eve of the India vs England Test series in London, on the state of affairs in Indian cricket, are unfortunately worrying.

The Indians are in a no-win situation. They are playing a Test series against England in their own backyard, where they have been in the back-foot for the last 10 years. Anybody will tell you the opening bowlers are an issue, and there are also problems with the middle-overs bowling. You can make out that the bowlers are not performing up to the mark. The batsmen are hampered by the strong bowling and the fielding of the opposing team. Kohli is a good leader and a super batsman, but if his team is not winning, then that is a problem. He should be dropped from the squad and replaced by another player who is performing well.

S. SIVATHANU

ON THE BACKFOOT

THIS EDITED column. The Bengaluru Residents Forum (BRF) has been in the forefront of protests against the proposed metro rail project in Bengaluru. The BRF has been raising awareness among residents about the environmental impacts of the project. The group has also been advocating for the protection of the city's green spaces and open areas. Mamata Banerjee, the chief minister of West Bengal, has been supportive of the BRF's efforts and has met with the group to address their concerns. The BRF hopes to continue raising awareness and working towards a solution that benefits all the residents of Bengaluru.

Varsha Jaiswal

OPPOSITION, UNITE

THE EDITOR - The opposition parties in India have a new name for the first time in many years. The National Democratic Alliance (NDA) has changed its name to the National Democratic Front (NDF). This move comes after the Bharatiya Janata Party (BJP) and the Janata Dal (United) (JD-U) decided to part ways, leading to the formation of the NDF. The NDF will operate as a single party in the upcoming general elections and aims to present a united front against the ruling Bharatiya Janata Party (BJP) and the Nationalist Congress Party (NCP).

Gorakhpur serial blasts case: e-Unani doctor gets life term

MANSAR

A Jodhpur court on Monday sentenced Dr Rajeev Thakur, a e-Unani doctor, to life imprisonment for his role in the Gorakhpur serial blasts case.

The court also convicted Thakur under Section 302 of the Indian Penal Code (IPC) for the murder of 92 people. The doctor was associated with the Islamic militant group Islamic Movement in India (IMI).

Thakur, who was arrested in Jodhpur, had claimed he was innocent and had been framed by the police.

The case is related to the series of blasts that occurred in Gorakhpur in December 2007. The blasts were claimed by the IMI and were believed to be a response to the demolition of the Babri Masjid in Ayodhya by Hindu fundamentalists in December 2001.

Apart from Thakur, the court also convicted two other men, Mubarak Ansari and Tariq Ansari, in the case.

The court sentenced Mubarak Ansari to life imprisonment and Tariq Ansari to 10 years in prison.

The case against Thakur had been filed in 2008 and the trial was completed in 2019.

The court had earlier acquitted Thakur in another case related to the Gorakhpur blasts.

**Decoding the virus variant**

India and several other countries have suspended flights to and from India. What mutations have led to the coronavirus variant that has caused concern? How rapidly has it spread? Will it impact vaccination?

**Simply Put & Answer**

**India**

**How does the coronavirus spike protein attaches itself to surfaces, freshly viewed?**

The researchers stress that seasonal changes on UV are not just one of many cases of “coincidence” in the world of science, but instead of “vital importance in understanding and guiding public health policies”. For example, the long-term study of the effect of seasonal changes on UV on the spread of the coronavirus will help to understand the potential impact of changes in UV on the spread of the new strain, which is likely to emerge in the future.

Seasonal UV radiation and global Covid trends

As an example, researchers have published a study about the correlation between seasonal variations in UV and the spread of the coronavirus. They found that a decrease in UV exposure by 1 standard deviation (SD) is associated with a 3-fold increase in the number of cases of COVID-19 per 10,000 people.

A change in UV exposure by 1 SD is associated with a 3-fold increase in the number of cases of COVID-19 per 10,000 people. This is a significant finding as it suggests that changes in UV exposure can have a major impact on the spread of the coronavirus.

However, it is important to note that the study does not establish a causal relationship between UV exposure and the spread of COVID-19. It is possible that other factors, such as social distancing measures and vaccination campaigns, may have also played a role in reducing the spread of the virus.

**What are the concerns leading to the new variant?**

The variant is the result of multiple mutations occurring in the genome of the virus, which is transmitted through the respiratory tract. The new variant has been identified in the UK and is now spreading in other countries.

**What does it mean for the future of COVID-19?**

As for the future of COVID-19, it is still too early to say. However, the emergence of the new variant highlights the importance of continued monitoring and research to understand the potential impact of changes in UV on the spread of the virus and to develop effective strategies to control its spread.

**India active cases: 303,639**

**India total cases: 10,055,560**

**Source:** Ministry of Health & Family Welfare

---

**The paper**

The paper, published in the journal Nature, is titled “The role of seasonal variations in UV radiation in driving the spread of COVID-19”. The authors, a team of scientists from the University of California–Santa Barbara, used data from previous studies to show that a decrease in UV exposure is associated with an increase in the number of COVID-19 cases.

---

**The experts**

The scientists behind the study argue that seasonal changes on UV can be a critical factor in understanding and guiding public health policies. For example, they suggest that changes in UV exposure can have a major impact on the spread of the coronavirus.

---

Australia detects UK’s Covid strain as several countries shut down flight routes

Workers construct guest rooms at a short-stay facility in Singapore’s Changi Airport as part of its upgraded quarantine facility in response to the new Covid-19 strain. The new arrangement due to start in late January will keep visitors segregated while allowing for separate meetings between people from abroad and from Singapore during stays up to 14 days. It is set to open next month.

The government is planning to extend the pandemic, but impact there would be up to March 31: FM

NEW DELHI, DECEMBER 21

Finance minister Nirmala Sitharaman said the government is planning to extend the pandemic, but impact there would be up to March 31. "We have done a reset on cause analysis and control systems that we will not lose work," she said.

"We have taken all the precautions," said Sitharaman, adding that there are some issues in the supply chain and travel sectors.

"We have to look at the whole scenario," she said.
