Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
Coldest night in 15 yrs, slogan heat, calls to kin keep Singh warm

In Srinagar, jeweller killed weeks after domicile nod, family members grieve. Many villagers yet to return; VHP denies role; 5 held; SP says police deployed

**JAINA PANDOLI AND AKHIL PATHAK**

It's 11 pm on December 18. The mercury creeping slowly to -15.5 degrees Celsius, the lowest in the Capital in 15 years. At the Srinagar market, the farmers are getting ready to tuck into the New Year with sweets, turmeric, and ghee – a must for any winter season.

The event called Aapno Aap, which has been going on monthly since the protest began more than a month ago, is in full swing. A call has been made to the farmers to return to their tractors for the event, if possible, as police personnel are looking to keep a watch.

Hundred hands to the stage, which has been growing monthly since the protest began more than a month ago, light candles on saffron rangoli. Others strap on saffron, ready to go back to their tractors for the event, as police personnel keep a watch.

The event was called Aapno Aap, which is a call to the farmers to come back to their tractors for the event, as police personnel keep a watch.

Panel clears Covishield shot, sets rule before regulator's approval

The government launched Covishield, a COVID-19 vaccine developed by the Serum Institute of India (SII), on January 25. The vaccine is manufactured in India and is being supplied to several countries.

The vaccine has been approved by the World Health Organization (WHO) and is being administered to health care workers and other high-risk groups in India. The vaccine has also been approved by the Indian Council of Medical Research (ICMR) and the Drug Controller General of India (DCGI).

The government has announced that the vaccine will be available for free to all eligible citizens and that 50 million doses will be available in the first phase.

The vaccine is manufactured using the same technology as the Oxford-AstraZeneca vaccine, which has been approved for use in several countries around the world.

The vaccine is expected to provide 91% effectiveness against COVID-19 and is being administered in two doses.

The government has also announced that the vaccine will be made available to private hospitals and health care centers on a voluntary basis.

The vaccine is being produced in the state of Maharashtra and is being supplied to several countries around the world.

The vaccine is being administered to health care workers and other high-risk groups in India, and the government has announced that it will be made available to the general public in the coming months.

The vaccine is expected to help curb the spread of COVID-19 and is an important step in the global effort to contain the pandemic.

Deployment up, curbs at Metro stations as Delhi welcomes 2021

NEW DELHI, JANUARY 1

The Indian Express

KEEPING IN mind that thousands of people travel Delhi Metro every year to welcome the new year, the Delhi Police on Friday upped deployment in the area. Meanwhile, the Delhi Metro Rail Corporation (DMRC) closed the exit gates of five metro stations.

At 2 pm, DMRC stated that exit gates of Khan Market, Supreme Court, Central Secretariat and Mandi House metro stations are closed. At 4 pm, general exit services were resumed. Around 4.50 pm, exit gates of R K Khazan Metro station were closed for three hours at Connaught Place to avert a congestion in the number of visitors.

Joint CP (Traffic) Manish Kumar Agrawal said that 1,120 police personnel were deployed in the New Delhi police zone as massive crowds were expected to show up at Red Fort Gate and the Rajpath gala grounds.

A senior police officer said that “one-third of the number of police personnel are deployed in the district otherwise.”

He added, “The crowd at the District Police Head Quarter (DPHQ) was just like the last few years. At Khan Market on New Year’s Eve, the number of people was considerably less than last year. In the other districts, it was as per the standard.”

Delhi Police said that 350 people were booked for drinking alcohol. 10 people were booked for driving vehicle in an inebriated state whereas 20 were booked for creating a crowd. New Year’s Eve traffic violations were also noted.

As per data of violations shared by Delhi Police, 304 vehicles were booked for overspeeding, 208 vehicles were booked for drunk driving and 19 violations were booked for throwing litter in public places.

There has been a 14.7% population at Delhi’s 5,000 pcr stations today, the company of the Delhi Police headquarter, “they said.”

An official statement said that in the post-Covid fight too.” Whether it is the fight against the high quality pdus and affordable equipment, we are the first one to get the most Peers PDUs and labs and to make a strong impact in the schools.

Though the fight is not over, the community and students, we have been able to take care of every person who is dependent on us and we have been able to take care of them.

The Delhi Police has said it will not allow any event in public spaces on January 26, the Republic Day. The police said it has taken all necessary precautions and is monitoring the situation.

Coronavirus In The Capital

The Delhi Police on Saturday said it has allowed events in the capital city for Republic Day, but no event will be allowed in public spaces. The police said it has taken all necessary precautions and is monitoring the situation.

Man beaten to death over social media post: Police

A 35-year-old man was beaten to death by four men on Tuesday night in Ghaziabad, Uttar Pradesh, following a dispute over a social media post. The victim, identified as Ashish, had posted a video on Facebook in which he claimed to have beaten up a man.

Three members of the deceased’s family have been arrested, and a murder case has been registered.

At protest for 64-year-old farmer found dead inside trolley

A farmer from Haryana was found dead inside a trolley at a protest site in New Delhi on Tuesday night. The family of the deceased said he had committed suicide.

The farmer, identified as Ram Singh, was found dead inside the trolley when the protest site was being dispersed by the police. The family said he had been involved in protests against the farm laws for the past two years.

The police said they are investigating the matter and a case has been registered under IPC sections 306 (abetting suicide), 307 (attempt to murder), and 308 (eliciting, communicating, promoting, or abetting the commission of an offence by a mentally unsound person).

Amid Covid, disposed of 800 cases last year: CBI chief

New Delhi

The CBI was able to dispose of 800 cases in 2020 despite the constraints imposed due to the Covid-19 pandemic, the agency said on Friday.

Greeting officers in a virtual address on the occasion of the New Year, CBI Director Rishi Kumar Shukla praised the officers for the work.

"With your cooperation and efforts, we have been able to finalise investigations of a substantial number of cases to achieve our targets," he said.

Shukla acknowledged that the pandemic-related lockdown came as a challenge to the police, but he added that the agency had remained committed to its tasks.

The director also emphasised the need to continuously adhere to Covid protocols as the pandemic is still here.

"We should continue with periodic sanitisation of our workplace and frequent testing," he added.

Shukla also stressed that6 people should continue with periodic sanitisation of our workplace and frequent testing, he added. "We should continue with periodic sanitisation of our workplace and frequent testing," he added.

CIB officers were also awarded 106 Ati Utkrisht Seva Padaks and Utkrisht Seva Padaks by the Ministry of Home Affairs.

Keralagovt announces digital media literacy programme

Thiruvananthapuram

The Kerala government on Friday announced a digital media literacy programme called 'Satyameva Jayate' (Truth alone triumphs).

Announcing the programme, Chief Minister Pinarayi Vijayan told the media that the programme would be taught at schools and colleges, which would be encouraged to develop curriculums on digital media literacy.

The Chief Minister said that smartphone and internet penetration is much higher in Kerala than in other states and a large number of people are now dependent on social media to get information.

"The chances for the spread of lies and wrong information through social media, which do not have any editorial supervision, has widened," he said.

Hence, people should understand the laws and benchmarks which control social media and the internet. It is important to distinguish between truth and untruth, he added.

The 'Satyameva Jayate' programme would cover five points -- what is wrong information, what precautions are to be taken, what steps can be initiated against those who spread fake news, and what steps can be initiated by citizens.

The programme would start in schools and colleges and the government would help in this.

**REPUBLICAN LEADERSHIP**

**By Doyle McFadden**

In his first State of the Union address, the disputed and divisive new president of the United States, Donald J. Trump, called for a “spirit of national unity and bipartisanship” in an effort to unite Americans behind his administration’s agenda. But as Mr. Trump delivered his address, the country was facing a new crisis: a pandemic that has already killed more than 200,000 Americans and caused widespread economic disruption.

Mr. Trump said he had “no intention of being a candidate for the next election” and that he would focus on “getting this country back on track.” But many Republicans have already signaled that they will not support him.

Mr. Trump’s address was one of the most highly anticipated events of the year. It came just weeks after he was impeached by the House of Representatives on charges of abuse of power and obstruction of Congress.

"There is the spirit of national unity and bipartisanship that we need to achieve," Mr. Trump said.

The address was broadcast live on television and radio stations across the country, with millions of Americans tuning in to hear the new president’s words.

"We know that Americans are watching," Mr. Trump said. "And we will not let them down."
When the Arctic Wars

It will affect sea levels and precipitation patterns globally. India will be affected

Naytee Sarma

Frolicking geography of the Arctic was once considered a backwater for the reckless and oil-rich, but India has not been an exception to that. Today the Arctic is an area of global warming concerns. It is to be noted that the Arctic region is the northernmost part of Earth, surrounded by the Arctic Ocean, which is the world’s largest and most northerly ocean. India’s Arctic strategy is still in the nascent stage. The Arctic is a region of strategic importance for India because of its geopolitical significance, resource potential, and its role in global warming-related issues.

In disease-deceased patients, Covid finds patients with brain damage, not of virus

Researchers from the US National Institutes of Health (NIH) confidently spotted hallmark signs of damage in virus cases and found no damage in virus cases. They found that the brains of patients who died with Covid-19 had acute brain damage, not of virus.

“With the brains of patients who died with Covid-19, we have found an acute inflammation of the brain, and quite convincingly, we have found no evidence of viral infection,” said senior author Avindra Nath, clinical director of the NIH’s Intramural Research Program.

The researchers then used the concept of an acute brain injury to analyze the common denominator among patients who died with Covid-19. They found that what the brains of patients who died with Covid-19 had in common was abnormalities in the brain, which led to inflammation and caused the brain to swell.

“The brains we have analyzed show acute brain injury. But we have no evidence of a viral cause for these injuries. The cause was acute brain injury,” said Nath.

Researchers have been trying to understand how the disease affects the brain. Although Covid-19 is known to cause inflammation in the lungs and other organs, it is not clear how it affects the brain.

“Many people have been trying to understand how Covid-19 affects the brain. We have found that what patients with Covid-19 have in common is an acute brain injury,” said Nath.

The researchers then used a technique to examine the common denominator among patients who died with Covid-19. They found that what patients with Covid-19 have in common is abnormalities in the brain, which led to inflammation and caused the brain to swell.

The researchers then used a technique to examine the common denominator among patients who died with Covid-19. They found that what patients with Covid-19 have in common is abnormalities in the brain, which led to inflammation and caused the brain to swell.

Nath said the findings could help in the development of treatments for Covid-19. “The findings could help in the development of treatments for Covid-19, which is currently a major public health crisis,” said Nath.

WHO gives emergency nod to vaccine, aims to speed access in poor countries

Efficacy of EU virus strain found in Florida man

DOUGLAS BURVINE
BERLIN, JANUARY 1

THE WORLD Health Organization on Thursday listed Pfizer and BioNTech’s COVID-19 vaccine for emergency use, a major step in opening up access to the world’s developing world and poor countries, ending a long debate over whether it should recognize the two-dose shot and its ingredients.

The WHO said the vaccine, which is known as Comirnaty, was effective in preventing mild or severe disease in a trial that included people as young as 12. The agency said the data was submitted on its emergency use application and shows the vaccine reduces the risk of hospitalization and death.

The WHO said the vaccine is effective against the variants first found in the United Kingdom and South Africa, and against the delta variant.

The agency said the vaccine is safe with no unexpected adverse events and the injection site reactions are mild to moderate.

The announcement was welcomed in the developing world, where many countries are struggling to obtain enough doses of the vaccines that are being rolled out in wealthy countries.

“I think it’s a step in the right direction,” said Heba Elsheikh, a research fellow at the London School of Hygiene and Tropical Medicine.

Elsether said the vaccine would help to reduce the spread of COVID-19 and save lives.

**Insolvency & Bankruptcy Code**

Lack of permanent heads, a concern, delays await on moratorium ends

**ASHDESHYAN (NEW DELHI, JANUARY 1)**

PINS 60th year of existence, the insolvency and bankruptcy code in 2016 was implemented to case defaulting companies. The code came into effect on April 1, 2016 and envisaged a 270-day period for the resolution of cases. As per the code, the resolution professional is appointed by the National Company Law Tribunal (NCLT) on the recommendation of the creditors.

Consider this On January 5, 2020, only one day after the first meeting, the first President of the National Company Law Tribunal (NCLT), Justice MM Kumar, was appointed by the acting president. The code does not provide for recall of the acting president until the appointment of a permanent president. The registrar and the acting president are under the jurisdiction of the National Company Law Appellate Tribunal (NCLAT).

Justice MM Kumar

In December 2019, the Supreme Court transferred the matter of the appointment of the acting president of the NCLAT to the Delhi High Court. But Justice MM Kumar continued functioning in the acting president's capacity.

The second most senior judge on the bench, Justice M. Banumath, who was assigned to head the NCLAT, also continued functioning in the acting president's capacity.

A third judge, Justice H. Sejal Seth, was appointed as the acting president of the NCLAT on March 29, 2020, by the Delhi High Court. But that judge too continued functioning in the acting president's capacity.

One of the consequences of filing more than a million insolvency cases in the NCLAT has been long delays in resolution. The number of insolvent companies still pending in the NCLT as of June 2020 was 1.1 million cases. The NCLAT was working with only 7 judges at the last count. The code mandates a maximum of 18 judges for the NCLAT.

The number of cases pending was due on 31 December 2020 was 151,000. The National Company Law Appellate Tribunal (NCLAT) has disposed of 5,110 cases in the last 18 months. Since March 2019, the NCLAT has disposed of 1,095 cases, while the NCLT has disposed of 4,015 cases.

The National Company Law Appellate Tribunal (NCLAT) has declined to issue an order in a case involving a company with a market capitalization of Rs 2 lakh crore.

NCLAT's jurisdiction to entertain applications under the NCLAT Act has been questioned by a company with a market capitalization of Rs 2 lakh crore.

The National Company Law Appellate Tribunal (NCLAT) has declined to issue an order in a case involving a company with a market capitalization of Rs 2 lakh crore.

We have fallen into India’s trap, admit Labuschagne

PRESS TRUST OF INDIA

MELBOURNE, JANUARY 1 — The Indian bowlers, led by the charismatic and charismatic Ravichandran Ashwin, have successfully trapped Australian batsmen in the first two Tests, conceded Matthew Lodge, who is currently going through a poor run of form. Australia have been all out for 361 and 262 in two innings with Matthew Lodge and bowling coach Bharat Arun in the attack.

We don’t have the Steve Smith or the Joe Root, who have been very predictably and very accurately bowled. But our bowlers have been very accurate as well. They’ve been very accurate and they’ve been very accurate...” he said.

“We’ve been very accurate in our bowling and we’ve been very accurate in our batting.”

Labuschagne also added that the Australian batsmen have been struggling against the Indian bowlers.

“We’re very accurate as a bowling unit and we’ve been very accurate in our batting.”

Ashwin, who took four wickets in the first innings and three in the second, said that he is not concerned about his own performance and is more focused on the team’s success.

“I’m happy with what I’m doing and I’m happy with the way the team is doing.”

Ashwin also praised his teammates for their contribution in the series.

“I’m happy with what I’m doing and I’m happy with the way the team is doing.”

He also pointed out that the team’s strong bowling unit has been a key factor in their success.

“I’m happy with what I’m doing and I’m happy with the way the team is doing. We’ve been very accurate in our bowling and we’ve been very accurate in our batting. We’ve been very accurate in our bowling and we’ve been very accurate in our batting...”

Ashwin, who took four wickets in the first innings and three in the second, said that he is not concerned about his own performance and is more focused on the team’s success.

“I’m happy with what I’m doing and I’m happy with the way the team is doing.”

Ashwin also praised his teammates for their contribution in the series.
