Stubble burning season over but pollution in capital still serious, take action, says Javadekar

EXPERTS VIEW

Mainstream media and social media.

National Capital Region (NCR) union environment minister Prakash Javadekar on Saturday said that steps need to be taken to address air pollution-reduction measures in the capital still serious, take action, says Javadekar.

Javadekar said, "The AQI is likely to stay in the 400-500 range for the next few days. This is because of the stubble burning season being over but the pollution levels are still high in the capital."

"Steps need to be taken to address air pollution-reduction measures in the capital still serious, take action, says Javadekar," he added.

The minister also said that the government is working on a new air pollution policy which will be introduced in the upcoming legislative session.

The minister also said that the government is working on a new air pollution policy which will be introduced in the upcoming legislative session.

He further said that the government is also planning to introduce a new policy for the development of the NCR region, which will focus on sustainable development and pollution control.

On the issue of stubble burning, the minister said that the government is working on a new policy which will be introduced in the upcoming legislative session.

INDOOR POLLUTION CAN BE FATAL

It is well known that outdoor polluted air can cause irreversible damage to the respiratory system. And it is not just happening outside your homes! Indoor air pollution is 100 times more hazardous than the toxic outdoors. Indians spend 85% of their time indoors either at home, office or while commuting. Common factors at home such as tobacco smoke, cleaning products, carpets, HVAC and heating appliances contain moulds, bacteria, viruses and fungi and can cause long-term health ramifications due to poor air circulation. The Indian Capital’s air quality index (AQI), has been in the hazardous category for long.

The Covid-19 pandemic has created a situation where indoor space is now considered unhygienic and a breeder of the virus. Coughs and throat infections have spiked. Beyond just close contact with an infected person, airborne particles carry the virus for long periods as confirmed by WHO. Entertaining guests and living amongst large families have rippling consequences in the absence of purified indoor air.

ESSENTIAL OILS ARE THE ANSWER

There is a solution to Purified Air. Along with ventilation, using essential oil based non-chemical aerosol “Air Purifying Spray” by Puressentiel is the alternative to clean air.

Essential oils at the molecular level, contain beneficial compounds like antioxidants, terpenes, and esters that may help treat many physical and emotional health issues. They have more than 10,000 known aromatic components, which explains why their therapeutic arsenal is so extremely varied and extensively developed.

Essential oils can soothe anything from a sore throat to a stomachache, skin or urinary tract infection, sleep disorder or digestive problems. And much more.

The Air Purifying Spray with its unique 41 essential oil-based formula has been clinically proven to kill 99.95% virus, bacteria and dust mites. The Patented Formula is 100% natural with no propellant gas or synthetic perfume. A few sprays in an enclosed space like bedrooms, bathrooms, cars, closets, shoe racks will purify the air and keep your family protected indoors for long hours.

CLEAN THE AIR YOU BREATHE

NIA to probe Nagrota encounter case

Deepti Mantri

THE INDIAN EXPRESS, WWW.INDIANEXPRESS.COM

According to functionaries, the ministry is being lost at a considerable rate through unsustainable processes. Global estimates of desertification, salinization, compaction, acidification and other land degradation phenomena vary across regions. The pandemic is alive and kicking in many ways, for nutrient supply, water storage, pollination and ecosystems services around the farm fields at 0.75 to 1% level. ITC has worked in 111 districts across 100+ states through a bundling of agricultural, environmental and social capital as an integrated approach to improving soil health and biodiversity. These natural resources are crucial for agricultural and rural livelihoods. ITC has set an example of how to protect and conserve the soil, water and biodiversity. ITC has set a milestone for the future.
India News

New Delhi: The Supreme Court on Friday dismissed a plea, urged by pro-Kannada organisations to get the Centre to direct the creation of a trust comprising government nominees to monitor the Ayodhya mosque trust. The petition was filed by pro-Karnataka organisations, wlak in the Special Appeal No. 33 of 2016 (Petition No. 14271 of 2016) by the petitioners. The petitioners had urged the Centre to direct the creation of a trust comprising government nominees to monitor the Ayodhya mosque trust.

The Centre had earlier informed the court on December 8 that the Sunni Waqf Board that manages the Ayodhya property had selected a team of trustees comprising government nominees. After the Centre informed the court of the appointment of government nominees to manage the Ayodhya mosque, the pro-Karnataka organisations moved the court to direct the Centre to appoint government nominees to monitor the trust.

The Centre had informed the court that an inundation took place in the area and the government was monitoring the situation. The Centre had also informed the court that steps were being taken to provide relief to the affected people.

The Centre had also informed the court that the government was monitoring the situation and that steps were being taken to provide relief to the affected people.

Provisions of UP anti-conversion law added to kidnapping case in Sitapur

Kashika Sharma from Himachal Pradesh and Pradeep Kumar, a resident of Uttar Pradesh, have moved the Allahabad High Court challenging the provisions of the U.P. Anti-Conversion Act, 2020.

The petitioners have claimed that the provisions of the law are discriminatory and in violation of the Fundamental Rights guaranteed under Article 14 of the Constitution of India.

The petitioners have submitted that the provisions of the law are arbitrary and unreasonable and violate the right to equality and freedom of religion.

The petitioners have prayed for the quashing of the provisions of the law and declaration that they are violative of the Fundamental Rights.

The petitioners have also prayed for a direction to the State Government to provide adequate protection and ensure that the provisions of the law are not misused.

The petitioners have further prayed for directions to the State Government to initiate steps for the redressal of grievances of the petitioners and other persons similarly situated.

The petitioners have submitted that they are aggrieved by the provisions of the law and are filing the petition for the above-said relief.

ED files plea against Iqbal Mallya

Iqbal Mallya: The financial affairs committee (FAC) of the lenders’ forum has decided to move the Bombay high court seeking to declare its member Iqbal Mallya, the former chairman of Kingfisher Airlines, as a fugitive under the Prevention of Money Laundering Act.

The forum, which is a forum of 15 banks, had earlier directed Mallya to pay Rs 950 crore along with interest for the non-payment of dues. The forum had also provided all the necessary documents to the Enforcement Directorate (ED) for declaring the tycoon as a fugitive.

In the case, ED is seeking a court order declaring Mallya as a fugitive under the Prevention of Money Laundering Act.

The National Investigation Agency (NIA) has arrested Satish Kashyap, the former managing director of Venezuela's national oil company, in connection with a multi-crore corruption case.

Kashyap was arrested from his residence in Mumbai on Tuesday. The NIA had been investigating the case for over a year, during which time it had conducted several searches and seized a number of documents and electronic devices.

The case involves a multi-crore corruption scam involving the purchase of crude oil and gas by the Indian government from a number of countries, including Venezuela, over the past decade. The scam has been under investigation by the NIA for over a year. The NIA had conducted several searches and seized a number of documents and electronic devices.

GROWTH PANGS

With inflation continuing to be a worry, RBI leaves rates unchanged, signals policy support to economy to continue

NEW DELHI: The Monetary Policy Committee (MPC) of the Reserve Bank of India (RBI) on Tuesday remained unanimous to maintain status quo on key policy rates.

The MPC voted 5-0 to keep the repo rate unchanged at 5.40 per cent and the reverse repo rate at 6.20 per cent. The policy stance will be accommodative for now.

The MPC expects inflation to remain subdued and will wane by Q4 2022. It will remain within the target range of 2-4 per cent towards the end of the current financial year.

The MPC would, however, monitor developments closely to make timely adjustments to policy settings if necessary.

The MPC expects inflation to remain subdued and will wane by Q4 2022. It will remain within the target range of 2-4 per cent towards the end of the current financial year.

So far this fiscal, inflation has averaged around 7 per cent, much higher than the 2 per cent targeted by the government.

As a result of its accommodative stance, the real GDP growth is seen rising to 7.5 per cent, up from its October policy forecast of 9.5 per cent. Growth is now expected to be driven by demand side factors.

The recovery, however, is expected to remain fragile and stressed sectors will continue to face adverse shocks from the pandemic.

So, the MPC expects inflation to remain subdued and will wane by Q4 2022. It will remain within the target range of 2-4 per cent towards the end of the current financial year.

Lab-grown meat cleared in Singapore, emerging alternative worldwide

The NUS team 3D-template for growing meat is cleared for commercial use. The Singapore agency also approved another 123 companies for the fast-track application route, of which 33 have received sanitization clearances.

PROGRESSIVE receptors have welcomed the breakthrough in 3D-grown meat technology, which will provide Singapore with a safe, consistent and sustainable protein source. The NUS team, led by Professor Zhong Shushan, has developed a 3D printing technology that can create muscle fibers using a 3D printer and genetic engineering. The process involves bioprinting muscle cells and extracellular matrix molecules to form muscle fibers, which are then cultured in a bioreactor. The team has successfully cultured porcine muscle cells and has achieved a muscle yield of 80%.

Mary Ann O'Rourke, a specialist in 3D bioprinting and regenerative medicine, said, "This is a significant breakthrough in the field of regenerative medicine and has the potential to revolutionize the way we produce food."

The 3D-printed muscle tissue is cultured in a bioreactor and is then harvested and subjected to a post-processing step to remove extracellular matrix molecules. The resulting muscle fibers are then harvested and used as a meat product.

"This is a game-changer for the food industry," said O'Rourke. "We can now print muscle tissue directly from cells, without the need for animal farming."

The team has also developed a bioprinting method for skin regeneration, which can be used to treat burn injuries and other skin conditions.

The breakthrough in 3D-grown meat technology is expected to have a significant impact on the food industry, with potential applications in the production of meat substitutes and alternative protein sources. The team is also exploring the potential of using 3D bioprinting to create custom-made organs for transplantation.
In seismic shift, Warner Bros to stream all 2021 films

WARREN, Dec 4 (Reuters) - Warner Bros on Thursday surprised the movie industry when it announced it will start streaming all its films directly to homes in 2021, a bold move that could push the Hollywood studio out of the theaters for the first time in its 117-year-old history.

The first move comes on the heels of a decision by Netflix to release its most recent titles directly to its streaming service.

The studio's chief executive told reporters before the news conference that the studio was now a "hybrid" character: that is, "streaming will be the future of our business but theaters will still be a very important part of our business.

Warner Bros is owned by AT&T, which bought the studio in a deal worth $85bn.

"We believe in the power of the film going experience," said AT&T CEO John Stankey, who is also Warner Bros chairman. "But we also believe in the power of streaming."

The new strategy has the potential to completely disrupt the film industry by allowing the studio to reach audiences without the need for a theater release.

"This is about building on the success of our film streaming strategy and being even more audacious as we meet consumers where they are," said Stankey.

The announcement comes after a year of uncertainty for the industry due to the coronavirus pandemic, which has caused most theaters to temporarily shut down.

The studio's film slate for 2021 includes titles such as "Godzilla vs. Kong" and "Tenet".

The move could also have significant implications for the wider film industry, as other studios may follow suit in order to stay competitive.

Biden says he will publicly take Covid vaccine, keep Fauci

WASHINGTON, Dec 4 (Reuters) - US President-elect Joe Biden said on Thursday he would publicly take the coronavirus vaccine after US health authorities said fully vaccinated people could return to the White House without needing to wear masks or undergo testing.

"I will be the first to take a shot. If I can do it, you can do it. We will make it easy for you to get vaccinated," Biden said in a televised address.

The US government has been under pressure to demonstrate its commitment to the vaccine rollout after criticism of the slow pace of the rollout.

"We're going to make sure everyone has access to the vaccine. Everyone," Biden added.

Fauci: US needs 156,000 COVID-19 deaths to equal 1st case

WASHINGTON, Dec 4 (Reuters) - As the United States recorded nearly 300,000 confirmed coronavirus deaths on Thursday, Anthony Fauci, America's top infectious disease expert, expressed regret that the country had not taken a more aggressive approach to controlling the pandemic.

"As a society we have not done enough," Fauci said during a White House briefing.

"We need to do better. We need to do better. We need to do better," he said.

"The US needs to learn from the Great Depression, when it took 156,000 deaths to stop the spread of the H1N1 flu virus," Fauci added.

"We need to do better, but we need to do better."
The Reserve Bank of India (RBI) has decided to bring the stressed sectors identified by the Kamath Committee under the RBI’s Targeted Long-Repo (TLTRO) scheme by making additional liquidity to stressed banks in order to revive activity and employment. 

The TLTRO with tenors of up to three years will focus on assisting 26 stressed sectors identified by the Kamath Committee in banking, says Das. The Reserve Bank of India (RBI) Governor Shaktikanta Das stressed the need for banks to invest in robust IT systems to effectively manage the post-COVID-19 world and ensure complete security of systems and data.

Status quo to revive growth on a durable basis

The Monetary Policy Committee (MPC) of the RBI on Friday kept key policy rates unchanged for the third consecutive meeting, given the impact of the COVID-19 pandemic on the economy, and said it expects inflation to remain elevated, barring transient factors. 

The MPC noted a tentative improvement in the outlook for growth and spurt in prices of perishables. 

The RBI also decided to keep the liquidity management framework of the Targeted Long-term Repos (TLTRO) scheme unchanged, while the Founding Digital Payment Company (FDPC) Scheme will be extended for a year, among other decisions.

The MPC has decided to keep the policy rates unchanged for the third consecutive meeting.

The overnight rate, at which the RBI lends funds to banks, was left unchanged at 4%.

The rates on liquidity management instruments remained at 4%.

What is the outlook on the inflation front?

The MPC noted that inflation expectations are likely to remain elevated, barring transient factors.

What are the MPC’s actions?

The MPC has decided to keep the policy rates unchanged for the third consecutive meeting.

What is the outlook on growth front?

The MPC noted a tentative improvement in the outlook for growth and spurt in prices of perishables.

Why the move to keep rates unchanged?

The MPC decided to keep the policy rates unchanged given the impact of the COVID-19 pandemic on the economy. 

The MPC noted a tentative improvement in the outlook for growth and spurt in prices of perishables.

What is the MPC’s concern?

The MPC noted that inflation expectations are likely to remain elevated, barring transient factors.

The MPC has decided to keep the policy rates unchanged for the third consecutive meeting.

What is the outlook on growth front?

The MPC noted a tentative improvement in the outlook for growth and spurt in prices of perishables.

Why the move to keep rates unchanged?

The MPC decided to keep the policy rates unchanged given the impact of the COVID-19 pandemic on the economy.

Williamson hits century as India earn imperious win

**THE INDIAN EXPRESS, SATURDAY, DECEMBER 5, 2020**

**SPORTS**

India won by 8 wickets

India A 308/2 in 50 overs (Kohli 123 not out, Chahal 71 and 3/30)

West Indies A 229 in 50 overs (Davids 78 and 3/49)

delivered a 12-ball 60 and took two wickets to ensure India A thumped the West Indies A by 8 wickets at the National Cricket Academy ground in Bengaluru on Saturday to keep their future tour hopes alive.

Kohli and Deepak Chahar put on 131 in 15 overs for the first wicket. Chahar continued his dominant form from the Bengaluru Test and scored 71 from 30 balls, hitting eight fours and three sixes.

India A skipper Rohit Sharma said: “A fine start and a great win for the team and the future tour plans. Very happy with the performance of the team.”

India A have now won six of their eight practice matches ahead of their two-match ODI series against Bangladesh which begins from December 15. According to the ICC, the second ODI will be played at the Maharashtra Cricket Association Stadium in Pune on December 17.

Chahar’s all-round performance ensured he was adjudged Man of the Match after finishing not out on 71 off 30 balls with his bat and picking up three wickets with his left-arm spin.

India A won the toss and opted to bat first. Crowning the first over, Chahal bowled a left-arm googly to David Rose for a leg-before-wicket decision.

The West Indies openers then added 32 for the first wicket before Bitting (24) was caught behind by Wriddhiman Saha. 

Chahar tempted Smith into a leg-siders swipe, leaving a large gap on the leg-side boundary behind the wicketkeeper. But Kohli instantly reviewed, whereupon the decision was overturned.

Kohli’s batting form with another thrilling exhibition.

In the second over, Chahal delivered a bigger googly to bowl Roston Chase for a leg-before-wicket decision.

Later, Chahal bowled the cross-seamer that landed on leg-stump, the second over to block a ballside Bheem Sharma. The wicket got only India A’s second wicket.

India A’s bowler Mohammed Siraj then dismissed Kevlon Anderson for 9 when Anderson played a false shot. India A scored 10 runs for the loss of just one wicket.

In his next over, Chahal delivered a leg-break which Kohli pulled to the leg boundary and the ball looked to be watered.

Chahal tempted Smith into a leg-siders swipe, leaving a large gap on the leg-side boundary behind the wicketkeeper. But Kohli instantly reviewed, whereupon the decision was overturned.

In the second over, Chahal delivered a bigger googly to bowl Roston Chase for a leg-before-wicket decision.

Later, Chahal bowled the cross-seamer that landed on leg-stump, the second over to block a ballside Bheem Sharma. The wicket got only India A’s second wicket.

India A’s bowler Mohammed Siraj then dismissed Kevlon Anderson for 9 when Anderson played a false shot. India A scored 10 runs for the loss of just one wicket.

In his next over, Chahal delivered a leg-break which Kohli pulled to the leg boundary and the ball looked to be watered.

Chahal tempted Smith into a leg-siders swipe, leaving a large gap on the leg-side boundary behind the wicketkeeper. But Kohli instantly reviewed, whereupon the decision was overturned.

Kohli’s batting form with another thrilling exhibition.
