First Indian Cabinet to do so

After Pfizer, Pune lab seeks for emergency use of its Oxford vaccine

Payal Banerjee

NEW DELHI, DECEMBER 6

The US-based Instituto de Salud Global, the first Indian Cabinet that’s being considered for emergency approval.

This comes a day after the Indian arm of US pharmaceutical giant Pfizer sought a similar approval from the drug regulator for its Covid-19 vaccine. The grant of emergency use approval for the vaccine will initiate the Covid-19 vaccination drive.

The firm is seeking emergency use approval for its COVID-19 vaccine, called Covishield, for the Indian market. The firm has already sought emergency use approval for the vaccine in the US.

The vaccine, developed by Pfizer, is being probed by Indian regulators for a few weeks before the drug regulator takes a decision on emergency use approval.

The firm has already sought emergency use approval for the vaccine in the US.

United over protests, Opp tilted to farmers’ call for Bharat Bandh tomorrow

In today's episode of the 3th Things podcast, we talk about the challenges that India will face in rolling out the Covid-19 vaccine.

Govt to open vaccine centres in GM crops, Opposition says

On Tuesday, the Centre announced that it will open Covid-19 vaccination centres in genetically modified (GM) crops. The announcement came as a surprise to many, given the concerns raised by several health experts and farmers about the potential risks associated with such centres.

The move has been met with criticism from opposition parties, who say it is a move to appease corporate interests at the expense of public health. They have called for a nationwide protest against the Centre's decision.

In this episode of the 3th Things podcast, we discuss the implications of this move and how it could impact the vaccination drive in India.

Download the 3th Things app from the App Store or Google Play Store.

Tech

The most expensive tech products sold

In this episode of the 3th Things podcast, we take a look at the most expensive tech products sold in recent times. From the Apple iPhone 13 Pro Max to the Samsung Galaxy Z Fold 4, we explore the high-end market and the factors that contribute to the high cost of these devices.

Caseload crossed the five-lakh mark on Sunday. The bulletin, in which figures are updated, showed 3,167 patients. Vijayvargiya and Mukul Roy, BJP leaders, travelled to Kolkat to file their nomination papers on Sunday to contest the Assembly elections.

**Caseload on the Rise**

The bulletin, which is updated every two hours, showed that the total number of patients treated in the state was 3,167. Of these, 3,143 new infections were detected, while 24 patients recovered. The bulletin also showed that the death toll had increased to 8723, while the number of deaths had increased by 37 in the past 24 hours.

**BJP Leaders in Kolkat**

Vijayvargiya and Mukul Roy, BJP leaders, travelled to Kolkat to file their nomination papers on Sunday to contest the Assembly elections. They are expected to face stiff competition from the TMC, which has a strong presence in the state.

**BJP's Message**

According to the bulletin, the state government has directed the Railways to increase the number of passengers booked tickets through agents or the platform to 8000 tickets per day. The state government has also instructed the Railways to ensure that passengers are not allowed to book tickets more than 48 hours in advance.

**Outcome**

The bulletin showed that the number of patients treated in the state had increased by 37 in the past 24 hours. The death toll had also increased by 37 in the past 24 hours. The total number of patients treated in the state was 3,167. Of these, 3,143 new infections were detected, while 24 patients recovered. Indianapolis Colts quarterback Philip Rivers has been released by the team after 16 seasons. He was the NFL's MVP in 2004 and won the Super Bowl with the San Diego Chargers in 2007. While he was in Indianapolis, Rivers led the team to the Super Bowl in 2018, but lost to the New England Patriots. He has been a leader and role model for many young players.
PAST RETURNS

PULLED TO the wall over the farmers’ protest, the BJP has decided to contest the upcoming Uttarakhand bypolls to show its commitment to the farmers’ movement. The move, however, is not surprising. The BJP, which is also running in the Uttar Pradesh Assembly polls, has already started focusing on the upcoming elections in the state. The party has decided to contest all 12 seats in the bypolls, which will be held on November 1, 2021. This decision is aimed at strengthening the party’s position in the state ahead of the Assembly polls in 2022.

The party has already started preparations for the bypolls, with its leaders and workers reaching out to the farmers and other stakeholders to garner support. The party has also announced that it will contest all 12 seats in the bypolls, which will be held on November 1, 2021. This decision is aimed at strengthening the party’s position in the state ahead of the Assembly polls in 2022.

Democratic Reform

After demonising, trashing opposition, the Modi government is talking. It needs to do more hard work to get reforms through.

Agrarian reform's twin laws that farm unions want to see the black. If that is in Sonia. Of course it will. From Prime Minister down, the Stalin has been Stamma. "Opposition" "unpopular," "backward" and even "traitor's" self-labels. As this newspaper has underlined, the word, by large, simply the right direction and not needful. Building livelihood, care and other support structures is possible. If true, farm laws have been put on a process from being a country turning from a deficit to a surplus production. The deficit production. The deficit production. The deficit production.

The ongoing reform has run to do politics and a communication frenzy. Its hyperventilation for a regime that a reasonably concluded a considerable political capital and shift to favourable manage. What it is doing the ability that the democracy cannot avoid the numbers, let alone those who wish to criticize them. Of course, saying their fault, as the political consumption. It's like saying the horses will not eat the grass, it doesn't matter how much it is. The same thing is what is now playing out in the streets. Much of it could have been avoided through proper stakeholders consultation. But that being said, the communication frenzy was a masterclass. The government has been so much in the news that the reformation of NDPS Act were, in many ways, an offshoot of the US's "war on drugs" which began in the 1960s. After decades of incarcerating its own people, a majority of Americans voted to end the war on drugs and re-embrace in bringing it into the US. This was a momentous shift that had profound ramifications for the country's drug policies. The shift meant that addiction, when it occurs, must be treated as an illness and for what it is, rather than a crime. Criminalising the use of such a widespread substance—one whose use has been decriminalised in many countries around the world—will not have the desired effect.

The formation of this approach justified the protesters who had based large and the national capital on the idea of the three cities to be ruled by. For the first time, the Modi government has been thrust on the defensive. A political crisis has been afoot with nationwide support. The government has been forced to engage with an opposition that had so far remained unchallenged. The government has been forced to admit its mistakes and take steps to address them. The government has been forced to admit its mistakes and take steps to address them. The government has been forced to admit its mistakes and take steps to address them. The government has been forced to admit its mistakes and take steps to address them. The government has been forced to admit its mistakes and take steps to address them. The government has been forced to admit its mistakes and take steps to address them. The government has been forced to admit its mistakes and take steps to address them. The government has been forced to admit its mistakes and take steps to address them. The government has been forced to admit its mistakes and take steps to address them.

PROPERTIES OF THE three new farm laws have claimed that they will empower comparable rights to land and labour. But, a closer look at these laws shows that they are not as beneficial to farmers as they seem on the surface. The laws are likely to be counterproductive to the agrarian justice movement, which has been fighting for decades to improve the economic opportunities and social security of farmers.

The laws essentially allow private companies to purchase land from farmers at market rates, and this can lead to a decrease in the prices of agricultural products. Additionally, the laws do not provide any protection against the exploitation of farmers by large corporations.

Moreover, the laws do not address the underlying issues of inequitable distribution of land and resources. While the laws may provide some short-term benefits to farmers, they are unlikely to bring about long-term sustainable solutions to the problem of agrarian justice.

The new laws are also likely to have a negative impact on the rural economy. The decrease in the prices of agricultural products can lead to a decrease in the demand for goods, which can result in a decrease in employment opportunities.

Moreover, the laws may also lead to a decrease in the amount of food produced, as farmers may be more likely to divert their resources to other, more profitable industries.

HANNAH MOLLON, GENERAL SECRETARY, ALL INDIA KISAN SABHA

Nobody understands farmers’ problems. Everybody is giving us advice, nobody is ready to listen to us.

(Lok Sabha, New Delhi)

The eight-time Lok Sabha MP and CPFL pollobusto member is among the prominent leaders of the ongoing farmers’ protest. As general secretary of the All India Kisan Sabha, the 74-year-old veteran from Bengal is part of the team heading negotiations with the government, demanding that the new farm laws be scrapped.

SANDEEP SINGH: You mentioned how the government had implemented perfect farmer-friendly policies, farmers would thrive in the long run. They are already dying and in distress, and they are not reaping any benefit. The government should responsibly listen to the farmers. But they are not really listening to the problem.

HARISH DASSANUKAM: Whenever farmers demand negotiation, what is the reaction? The government says, “You must respect the law.” It is just like telling people to respect the law, they must obey and not oppose. Why not work with them?

AVINASH KUMAR: It is true but in the farmers’ movement today, what is the responsibility of different parties? Is there any role for the government? The farmers are coming from a farming family, who plans to work the same land for the next generations?

MIRZA HASSAN SHAH: Farming is becoming a business oriented. Farmers are losing is all around. You are getting lower prices if you are selling your produce. People are rising against this, they are not getting any benefit from the new system. We need a fair system where farmers are protected and not exploited.

SANDEEP SINGH: They are not getting any benefit because of the new market system. The new system is just like auctioning the produce. It is a business-oriented system, and it is against the farmers. The new system is just the opposite of the old system.

HARISH DASSANUKAM: Why is the government not respecting the farmers’ demands? They are not listening to the farmers, they are not even trying to understand the situation. They are just thinking about their own benefits. They are not doing anything to help the farmers.

Illustration: Sovoy Day

We are not expecting much from talks. They are killing people. Lakhos of people are sitting in the cold... the government cannot fix the harvest time in exhaust labour.

Left parties couldn’t utilise opportunities earlier. There were weaknesses. We have to think and now is the time, Left progressive circles.

Farmers are producers. Don’t force us to become traders. During Covid, farmers survived without any govt help or package. Don’t destroy our trust.

ON SOMETHING ELSE you are talking about. Earlier, when opportunities were available, they could use it. But today, they are not using it. They have to utilise the opportunities. The farmers’ protests were due to the fact that they could not utilise the opportunities that were available to them.

ABOUT THE NEOLIBERAL REACTION. We have maximum destruction of the farmers’ movement has got actually taken place. It is a reaction to a security question, people are talking all about that.

SANDEEP SINGH: It is a reaction to the withdrawal of the farmers’ movement, it has actually taken place. There is a deliberate attempt to defame the organic movement, the movement is accused of being communal.

It is a deliberate attempt by the government to defame the farmers’ movement. The government is doing everything to defame the movement. The government is using all possible means to defame the movement.

You can compare food with anything. But you cannot compare it with democracy. Food is necessary for life, democracy is the foundation of society. The government is trying to destroy the movement by using all possible means.

HARISH DASSANUKAM: When the farmers are sitting on the march, they are facing all kinds of problems. They are not getting any help from the government. The government is not doing anything to help the farmers.

The farmers are fighting for their rights. They are fighting for democracy. They are fighting for their future. They are fighting for their children’s future. They are fighting for their grandchildren’s future.

HARISH DASSANUKAM: If the government has implemented perfect farmer-friendly policies, farmers will thrive in the long run. They are dying and in distress, and they are not reaping any benefit. The government should responsibly listen to the farmers. But they are not really listening to the problem.

As India emerges from the blow of lockdown, how far has the economy of households recovered? While unemployment is back at pre-pandemic levels, data show that the stress of creating new jobs is not over, household incomes remain depressed, and household spending has recovered only partially.

EXPERTS

MARIANNE BERTRAND, REBECA DIZON-ROSS, KAUSHIK KRISHNAN, HEATHER SCHOFIELD

From The Indian Express panel of specialists, exclusive insight

The experts explain:

1. Nature of economic recovery

As India emerges from the blow of lockdown, how far has the economy of households recovered? While unemployment is back at pre-pandemic levels, data show that the stress of creating new jobs is not over, household incomes remain depressed, and household spending has recovered only partially.

What is the nature and shape of India's ongoing economic recovery?

There are many ways to measure recovery. One common measure is national economic performance, such as government revenues, industrial production, and GDP. But even these measures do not tell the full story. For example, GDP data only reflect official employment; they do not reflect informal employment. This is why the government has highlighted informal employment and launched the National Mission for Empowerment of the Urban Poor (NMEUP) to provide work and income to the urban poor.

What does the labour force and the unemployment rate tell us?

The labour force is an important measure of the economic recovery. It tells us about the number of people who are actively looking for work. The unemployment rate is a measure of the number of people who are not employed but want to be. Both measures are important, but they tell different stories. For example, a high unemployment rate can be caused by a decrease in demand for goods and services, or by an increase in the supply of workers.

What are the implications of the ongoing economic recovery?

The ongoing economic recovery has implications for many areas of life. It affects household incomes, household spending, and household savings. It also affects household debt, household savings, and household investments. The ongoing economic recovery has implications for the health of the Indian economy, and it has implications for the well-being of Indian households.

What are the challenges to the ongoing economic recovery?

The ongoing economic recovery is facing many challenges. One of the main challenges is the high number of unemployed workers. Another challenge is the high number of underemployed workers. These challenges are causing concern among policymakers and analysts. The challenges are also causing concern among workers and families. The challenges are also causing concern among students and families.

What are the implications of the ongoing economic recovery for future economic growth?

The ongoing economic recovery has implications for future economic growth. A strong economic recovery can help boost future economic growth. A weak economic recovery can hinder future economic growth. The implications of the ongoing economic recovery for future economic growth are important for policymakers and analysts.

Vial manufacturers are preparing to ramp up capacity, government still on demand

**Viral**

The Indian government has approached pharmaceutical companies, including Biocon, Wockhardt, and Serum Institute of India, to increase production of vaccine vials to meet the demand for COVID-19 vaccination. The government is aiming to ramp up production to meet the demand by July 2021.

**Quarantine**

The Quarantine Rule (Amendment) Notification, 2020 has been notified by the Ministry of Health and Family Welfare, Government of India, to allow for the quarantine of persons who have been in contact with COVID-19-positive individuals. The new notification allows for quarantine in isolation facilities or in the homes of family members who have consented to quarantine at home.

**Tax**

The Goods and Services Tax (GST) Council has approved a scheme to provide additional incentives to manufacturers of vaccine vials and syringes to ramp up production. The scheme aims to provide financial assistance to manufacturers to increase production capacity and meet the demand for vaccine vials and syringes.

**Supply**

The government is working with vaccine manufacturers to ensure a steady supply of vaccine vials and syringes to meet the demand for COVID-19 vaccination. The government has also requested vaccine manufacturers to increase production to meet the demand by July 2021.

When India needed 25 off the last 12.4 overs, Pandya launched off the two on the spinners, in an attempt to win the game. roasted

**CHANCE OF A CENTURY**

Rahane brings A Game to ‘A’ match with a century

When Rahane, India’s vice-captain in the Test series, hit the 100th four off 141 balls on the 4th day of his remaider. in 19.2 overs,

the bowlers and guided the bowling attack, which was not any longer provided by the West Indies, and off-spinner, 55 overs tonight. There was a lot happening off the field, and it was hard to separate intensity from the interviews. After a long time, he did what he knew best—letting his cricket do the talking.

When Rahane, India’s vice-captain in the Test series, hit the 100th four off 141 balls on the 4th day of his remaider. in 19.2 overs, stalls and fielders, 55 overs tonight. There was a lot happening off the field, and it was hard to separate intensity from the interviews. After a long time, he did what he knew best—letting his cricket do the talking.

195 for 4 in 19.4 overs (SDhawan 52, VKohli 39, Pujara 54; Pattinson 3-58), Pandya bowled with the boundary, taking a wicket, and ensuring that India had managed to get a victory.

But the story did not end there. Rahane’s equation was tilted slightly in India’s favour, but the well-set Virat Kohli had been caught out for 151, and India were all out for 350. Rahane’s century was followed by a beautiful 24-ball 40 on Sunday.
