(An open ended debt scheme investing in instruments such that the Macaulay duration of the portfolio is greater than 7 years)

**This product is suitable for investors who are seeking**:

- Income over long term.
- Investment in Debt and Money Market Instruments with portfolio Macaulay Duration of greater than 7 years.

*Investors should consult their financial advisors if in doubt about whether the product is suitable for them.

**Sale of units after 36 Months of purchase entitles investor to avail indexation benefit for other than equity oriented scheme. Long term capital gain and short term capital gain Tax is applicable on redemption based on period of holding.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
Mothers on floors above, 10 babies killed in hospital fire

Neonatal unit cleared without fire audit, appeal for equipment pending

TABASSUM BHARNAGARII
NEW DELHI, JANUARY 9

IT WAS the first child, initial reports said, and Bhawna Behel, 22, a staffers daughter, was busy changing her baby’s diaper when the fire broke out. She was able to carry the child to safety, and the baby was saved. Others were not so lucky.

Military hospitals in the country have been in the spotlight of late, after the Centre’s Covaxin vaccine volunteer died at a hospital in Bhopal. This has tested the credibility of the Centre’s vaccination drive, and the government’s claims of being prepared in terms of vaccines and equipment.

A baby and four other children reportedly died in a fire that engulfed children’s wards in a government hospital in Bhopal on Saturday. The incident took place at the Bhandara District General Hospital in Madhya Pradesh.

While the Centre has been at the forefront of the vaccine drive, with the stockpile of Covaxin vaccine divided among hospitals in the Centre, the Madhya Pradesh government had said on Saturday that the Covaxin vaccine was not available at the Centre.

While the Centre has been at the forefront of the vaccine drive, with the stockpile of Covaxin vaccine divided among hospitals in the Centre, the Madhya Pradesh government had said on Saturday that the Covaxin vaccine was not available at the Centre.

The Prime Minister’s office had on Saturday announced the launch of a Co-WIN (COVID-19 Vaccine Intelligence Network) platform, which will provide real-time information of vaccination. The platform was launched by the Prime Minister on Saturday.

The Centre had also announced that the first batch of Covishield vaccine was being transported to states, and that the vaccine would be available to all states by the end of the month.

Several states have reported shortages of the vaccine, and the Centre has been criticized for not providing enough vaccine to states. The Centre had earlier said that it would provide 100% of the vaccine to states, but the states have been left to their own devices in terms of vaccine distribution.

The Centre has also been criticized for not providing enough vaccine to states, and the states have been left to their own devices in terms of vaccine distribution.

The Centre has also been criticized for not providing enough vaccine to states, and the states have been left to their own devices in terms of vaccine distribution.

Jan 16 is Vaccination Day One across three crore vaccine staff in line

Covid vaccination needs to be registered on Co-WIN platform. The staff groups will be planned after the date. The District Magistrate will plan the groups located within the 60 years age group. The vaccine will be given accordingly. The District Immunisation Officer (DIO) will prepare a list of the beneficiaries and submit it to the State Health Department. The list will be verified by the COVAXIN program and the local Panchayat (SPA) or the SP shall not be spared. He also said the vaccine would be given without any fear. The Co-WIN and SMS notification systems will be used to know the number of people who have taken the vaccine.

The vaccines would be sent in bulk from the vaccine depot to the local government. The vaccine would be delivered to the local government. The staff would be given the vaccine as per the schedule.

President Joe Biden’s challenge to Pakistan’s JeM chief, Masood Azhar, is a test of the US and its alliance’s commitment to the war on terrorism. Pakistan continues to use its territory to support terrorist attacks in India and elsewhere.

In times of unusual stress, such as the ongoing COVID-19 pandemic, we often seek solace in food that is familiar and nourishing. What is it that makes certain kinds of food more appealing than others in times of unease?

POINT OF VIEW

MississippiMasala

In their satiety value, carbohydrates do help in stabilising the blood sugar—and the memory becomes sharper. In a nutshell, carbohydrates do help in improving mood and mental well-being. For example, in a 2011 study on the effects of a high-carbohydrate diet on mood, researchers found that participants who consumed a high-carbohydrate meal experienced a significant increase in positive mood compared to those who ate a low-carbohydrate meal.

What is it about comfort food? A 2019 study by researchers at the University of Manchester and the University of California, Berkeley, found that eating comfort food can help reduce stress and anxiety. The study, which was published in the journal *Nutrition and Stress*, found that eating comfort food can help reduce stress and anxiety by activating the brain's reward system.

Comfort food is not just about the physical act of eating; it's also about the emotional and psychological effects of consuming certain types of food. Comfort food can act as a coping mechanism for stress and anxiety. According to a 2017 paper by American researchers from Johns Hopkins University, consuming comfort food can help reduce stress and anxiety by activating the brain's reward system.

The most interesting thing about comfort food is that it’s a concept that’s recognised widely enough that one never needs to explain what it is, yet it man-ages to encompass a mosaic of comfort foods—from soups, stews and hearty meat dishes in days of yore, to today’s confectionaries and snacks. How did it all come about?

A 2020 study conducted by the World Health Organization (WHO) found that one in three people worldwide were currently experiencing anxiety or depression, with the pandemic worsening the situation. In such times, comfort food becomes all the more important, as it can help to alleviate stress and boost mood.

A Year of Possibilities

No matter how invaluable we may feel, as individuals or nations, we all need periodic reality checks.

Sowri Saran

LATELY in 2021, a call from a long-lost cousin传来设立 Erik, the publisher of the Aboriginal Guide News Number City, changed the fate of a young lawyer and naturalist who already had her heart set on a career in journalism. After working for years in media and public relations on the world over, she found herself in India, where she began to take stock of her life. She recognized that her work as a journalist had given her a unique perspective on the world, and she was eager to share her stories with others.

I had my ahem moment with the stroke. For the majority, the storm of 2020 was one that unfolded over a longer period of time, and for many, it brought about a sense of-new norms and new realities that we all had to adapt to. From remote working to virtual meetings, from online shopping to contactless payments, we all had to adjust to a new way of living.

The saying goes, “What doesn’t kill you makes you stronger.” And while it may seem like a cliché, it is true. We have all been through so much, and we have all come out the other end, stronger and wiser.

So, let’s reflect on this year, and let’s be grateful for all that we have been through. Let’s be thankful for the support of our loved ones, and let’s be proud of ourselves for being able to overcome so much.

Sowri Saran

Editor-in-Chief, author, educator and world traveler

Sowri is an educator and world traveler. She has been working on her book and the adventures that come with it. Her book, “The Year of Possibilities,” is a collection of stories that she has written throughout the world. 

Brown suffering? How many more Black deaths will it take for America to make amends to the public's mistrust? Will we ever recognize the systemic failure that brought Donald Trump to power with substantial support from African Americans? Will the real conversation about Brown's death ever happen?

Nearly four decades ago, a quick-fix murder and its daredevil perpetrator stunned Kerala. With a new film coming up on the criminal mastermind who was never apprehended, former police officers recount a murder most foul.

Vishnu Varma

It’s been 37 years since that January morning, and it continues to be a hot topic of conversation. The story of Sukumara Kurup, a 30-something man from Chavakkad in Thrissur district who was known for his unique height and build, continues to capture the imagination of Indians—be it on television screens or even in real life. In fact, even today, you can find photos of him being paraded through the village to assure every- one that he was indeed the man who committed the crime.

By then, word had spread that the dead body was that of someone else. Nearly four decades ago, a quick-fix murder and its daredevil perpetrator stunned Kerala. The story of Sukumara Kurup, a 30-something man from Chavakkad in Thrissur district, continues to capture the imagination of Indians—be it on television screens or even in real life. In fact, even today, you can find photos of him being paraded through the village to assure everyone that he was indeed the man who committed the crime.

Sukumara Kurup was a young man who died in mysterious circumstances on January 21, 1984. He was a native of Chavakkad, in the Thrissur district of Kerala, and was known for his unique height and build. He was a popular figure in the local community, and his death shocked the people of the area. The circumstances surrounding his death were shrouded in mystery, and the police were unable to establish his identity. Sukumara Kurup was last seen alive on January 20, 1984, when he went to his friend’s house in Chavakkad to meet his friends. He was last seen wearing a black shirt and blue jeans.

On January 21, 1984, a body was found in a paddy field near Chavakkad. The body was that of a young man with a unique height and build, and it was suspected that he was the same person who was last seen alive. However, the police were unable to establish his identity, and the body was handed over to the local hospital for post-mortem examination. The post-mortem report revealed that the body had been subjected to severe physical and sexual abuse, and the cause of death was determined to be strangulation.

The police launched a comprehensive investigation to establish the identity of the deceased. They examined the body and the surrounding area, and they collected evidence from the paddy field. They also questioned several people who had been in the area on the night of January 21. However, they were unable to establish the identity of the deceased, and the case remained unsolved for several years.

In 1991, a man named Chacko, who had a distinctive height and build, was arrested for a similar murder. However, he was acquitted of the charges, and the case remained open.

In 2001, a movie titled “Kurup” was released based on the case. The movie was directed by V. A. Srinivasan and starred Mohanlal in the lead role. The movie was a huge hit, and it received critical acclaim. It was later remade in several languages and countries.

In 2023, a new movie titled “Kurup” was released, which was directed by Ranjit Raz and starred Dulquer Salmaan in the lead role. The movie was a sequel to the 2001 movie and was based on the same incident. It was released on January 10, 2023, and it received positive reviews from critics and audiences.

Despite the passage of time, the case remains unsolved, and the identity of the deceased remains a mystery. The police are still investigating the case, and they are hoping to bring the truth to light in the near future.

Bumrah, Siraj racial abuse by crowd, BCCI lodges complaint

The BCCI on Saturday lodged a formal complaint with the Australian Cricket Board for the racial abuse of Indian team players, Mohammed Siraj and Jasprit Bumrah, during the fourth Test against Australia. In a joint statement, the BCCI and Indian Board of Control for Cricket in India (BCCI) congratulated the two on their performances which earned them the Man of the Match award. The BCCI also said it has lodged a complaint with the Australian authorities. The BCCI said it will take all necessary steps to ensure that such incidents do not recur.

In the fourth Test, Siraj and Bumrah were allegedly racially abused by sections of the crowd at the Sydney Cricket Ground, the venue for the fourth Test. The BCCI said it has lodged the complaint with the Australian authorities and will take all necessary steps to ensure that such incidents do not recur.
