EXPLAINED: WHO WAS KARIMA BALOCH

Avocatess who was tried and convicted for her involvement in the Balochistan conflict.

In today’s episode of the 3 Things podcast, we talk to vintilator Dr Shajib Jamed about the new variant of SARS-CoV-2, and whether we really worry about it.

Jammu is set to become a major political battleground, with leaders from all major parties vying for the vote. The state is considered a bellwether for the rest of India, and the outcome of the election will be closely watched.

The Congress Party, which has traditionally been strong in Jammu, is facing a tough challenge from the Bharatiya Janata Party (BJP), which has been on the rise in the state. The ruling Jammu and Kashmir Government has been accused of rigging the election, but the BJP has not been able to capitalize on this.

Meanwhile, the National Conference and the National Congress Party are also contesting the election, along with regional parties such as the Jammu and Kashmir Janata Dal (U) and the Jammu and Kashmir Peoples Democratic Party (PDP).

The election is significant because it will determine the future of Jammu and Kashmir, which has been a flashpoint for political tension in recent years.

In the lead-up to the election, there have been reports of violence and intimidation, with both parties accusing the other of rigging the process.

Voting in the Jammu and Kashmir Assembly elections began on November 25, and will continue until December 23. The results are expected to be announced on December 28.

The election is significant for India, as it will be the first major test of Prime Minister Narendra Modi’s popularity since the 2019 general elections.

The BJP is expected to win a majority in the state, but the results will be closely watched to see if the party can consolidate its support in the region.

The election is also significant for the future of Jammu and Kashmir, which has been a flashpoint for political tension in recent years.

2 passengers from UK test Covid+ve at Kolkata airport

Samples sent for genome sequencing to check for new strain of coronavirus

**EXPRESS NEWS SERVICE**

KOLKATA, DECEMBER 22

TWO PASSENGERS tested positive for Covid-19 at Kolkata airport on Sunday, officials said on Tuesday. According to sources, the state health department had found the cases similar to the so-called Omicron variant.

The health department is conducting genome sequencing to check for new strains of coronavirus.

Fire on Tuesday morning in Duttabad slum, one of the worst-hit slums of the city, claimed the lives of at least 35 people. The fire department said 150 fire tenders and 10 fire carriers were pressed into service. Firefighters doused the blaze in the temporary structure on Eastern Metropolitan Bypass on KEJ Majerhat Bridge.

As many as 15 fire tenders were stationed along the slum to douse the fire. The fire department was receiving calls from local people for help while it took at least one and a half hours to control the blaze.

The local people in- stead of calling the fire department were calling the hospital. They added, “The cause of the fire was not identified. The samples are being sent for genome sequencing.”

A 50-year-old man was found dead in his employer’s house in the Jorasanko police station area, the police said. He was staying in the slum. A local person who was staying there was also found dead the same day.

According to the police, a motorbike was found missing. The victim was verbally abused by the accused a few days ago after a ‘spring cleaning’ at his employer’s house. He was beaten up and thrown out of the house.

“Out of 25, two passengers were found to be Covid positive,” said a doctor. They were taken to a quarantine centre. Airport sources revealed that the two passengers, who were air India direct flight from London to Netaji Subhash Chandra Bose International Airport, were found Covid positive.

**EXPRESS NEWS SERVICE**

KOLKATA, DECEMBER 22

A MAJOR fire broke out in Duttabad slum of Kolkata’s Eastern Metropolitan Bypass on Tuesday. Around 35 shanties were gutted, police said. The fire service had to be called in.

According to the police, around 8:45pm all diversions were withdrawn from Manicktala Main Road, “Manicktala Main Road,” said DC (Traffic) Rupesh Kumar.

Firefighting started on EM Bypass and also from Western Bypass. It took till 10am to control the fire. The front seat was in a compartment while 202 persons were in another compartment.

As per the health department, 81,429 persons are in home quarantine, 2,000 persons are in institutional quarantine and 202 persons are in safe house. The total number of active cases is now charged persons is nine.

POLICE PROBES

THE ARRESTS

The CBI arrested Sister Abhayawasap and Father Thomas Kottoor, found that master was dismissed, so he had to leave the hostel campus on the night of March 26, 1992, a day before Father Tomas Kottoor, the then-Church collector of Kerala, also visited the hostel to talk to Father Kottoor, which was the reason for the CBI to book him as an accused for destroying evidence. This led to the arrest of Father Kottoor and Sister Sephya. The CBI had been investigating the case for 28 years and had not found any evidence. So happy I might drink tonight. Thath who tried to annihilate me. I always knew that she would get justice and today, it has happened.

**SCIENCE IS KEY**

Covid variant may be taken seriously but a year into pandemic, science should guide policy, not alarm bells

The scientific consensus is clear: Covid-19, the novel coronavirus, has a variant that is becoming more transmissible and may be more deadly. This variant, discovered in the United Kingdom, is now spreading in many parts of the world, including India. The question is: How should we respond?

**RAJIV MEHRISHI**

The APMC Act of 1961 fixed the Indian farmer from the vagaries of the local trade market. (A Ramanth of Madras) uniquely had substantial control. Rigidity and thereby, just what gets sold was designated. In practice, such as deaths, levels of public health emergencies and natural disasters, the market is not always efficient. Covid-19 has given the medical community a glimpse of what might happen if the system is not in place to respond.

The problem is that the current approach is not working. The market for farm produce is fragmented, with multiple intermediaries involved in the supply chain. This not only leads to inefficiencies and losses but also makes it difficult for farmers to get fair prices for their produce. The current system is also susceptible to manipulation by traders who may manipulate prices to their advantage.

The solution lies in the implementation of a new model of trade and marketing that is more consumer-centric and less vulnerable to manipulation. This model, often referred to as the “MSP” model, involves the government fixing a minimum support price (MSP) for farmers, ensuring that they get a fair price for their produce. This model is essential for ensuring that farmers have the confidence to continue producing, which is critical for food security.

The government has already started implementing this model in some states, and there have been positive developments. For example, in states like Punjab and Haryana, the MSP has helped farmers get better prices for their crops. However, this model needs to be expanded to more states, and there needs to be greater coordination and cooperation between the government and private sector to ensure its success.

In the longer term, there is a need for a comprehensive agricultural reform agenda that goes beyond just fixing MSPs. This could include measures like providing better storage and transportation facilities, ensuring fair and transparent pricing, and addressing the issue of declining farm incomes. Such a comprehensive approach is necessary to ensure that farmers get a fair return for their work and that India’s agricultural sector can continue to thrive.
For India, despite a rising China, this is a favourable geopolitical moment, which it must seize to assure its place in a loosely structured multipolar global order.

**Shyam Saran**

**THE IDEAS PAGE**

The new league of nations

*For India, despite a rising China, this is a favourable geopolitical moment, which it must seize to assure its place in a loosely structured multipolar global order.*

**SAYANDWOR CHOWDHURY**

**Game on in Bengal**

There is no alternative for TMC, Left and Congress but to stitch together an alliance

India's instinctive preference has been for a multipolar order as the best assurance of its security and as most conducive to its own social and economic development. It now has the opportunity to make this foreign policy priority with this alignment of a large majority of middling and emerging powers. This will be an important component of a strategy to meet China's challenge. The techniques of diplomacy that were deployed successfully in leading the world to victory in an earlier time and in a different geopolitical context are relevant.

**Letters to the Editor**

**Crisis in Nepal**

Bhupesh Yadav

Kathmandu (December 22)

It is shocking to read such an article. The House of Representatives being brought as an agent to展览示威 has a natural reason. The issue appears to stem from the geographical location of the capital. Nepal, which is a landlocked country, holds only limited space. In such a situation, peaceful actions are needful. The issue of a President being elected is an issue of the people's right to vote. We must ensure that the rights of the people are respected and protected.

**HOLLOW WELFARE**

To the Editor: Notes from a new world (December 22). While Words being "essential", the variant that have evolved to appreciate them have been taking into December winter rains...
From Cormac the llama tiny antibodies that show promise against coronavirus

YUBARAJ GHIMIRE

The Lower House of Parliament has been dissolved at the recommendation of Prime Minister Oli, who is fighting a losing battle in his party. A look at the questions it raises over the Constitution and left unity

In the current study, the researchers used camel and llama nanobodies to prevent infections. Early researchers have been using camel and llama nanobodies to block SARS-CoV-2, the virus that causes COVID-19. Camel and llama nanobodies are easier to engineer than typical antibody research, researchers have been using them for medical research. Since the pandemic, several camel and llama nanobodies have been developed to prevent infections. In the current study, researchers used a slightly different strategy to develop camel and llama nanobodies.

The scientists at NIH-COVnb-112, appeared to work well and not affect the camel in any way, not even in the lymph nodes.

One of the best candidates is exactly the same separation as this one—separation of exactly 400 million kilometers and the solar system. The combination of the two planets' wavelengths produces a blue shift in the visible light, which then combines to create a blue star. The effect is very similar to the way a laser works, but in this case, the wavelength of the light is shifted by the movement of the planets. This process is repeated every 12 and 20 years, resulting in a cycle of strong and weak signals. This cycle is called a conjunction, which is a term used to describe a specific alignment of planets. In this case, Jupiter and Saturn are aligned in such a way that their wavelengths overlap and create a strong signal, which is detected by ground-based telescopes.

In this month's last conjunction, the two planets were at their closest alignment, occurring on March 16 and 17. This alignment occurred twice in 1990 and 2000, and again in 2020. The alignment is not perfect each time, but it is always close enough to produce a significant Signal. The alignment will occur again on September 16, 2025.

How frauds make use of fake GST invoices

"It's a trading company in Mumbai that has found it easy to use these invoices, booking fake purchases to evade GST on taxable supplies. The probe agency has found that the company, which is registered in Mumbai, has used these invoices to claim input tax credit and evade GST on taxable supplies. The company's GST invoice is larger than its purchase invoice, indicating that it has claimed input tax credit on supplies that it has not actually received. The investigation is ongoing, and the company is cooperating with the tax officials.

What is the reason for a surge in such cases?

"The surge in such cases is due to the government's initiative to increase the use of digital transactions and e-invoicing. The government has aimed to increase the use of e-invoices to simplify the GST collection process and reduce the use of physical invoices. The government has also introduced the GST invoice registration system, which requires businesses to register their invoices with the GST network. The goal is to reduce the incidence of fake GST invoices and ensure that the GST system is fair and transparent. The government is also working on improving the GST administration, including the GST network.

How is the government planning to curb such cases?

"The government is planning to tighten the GST registration process and legal measures to curb the use of fake invoices. The government has also introduced the GST invoice registration system, which requires businesses to register their invoices with the GST network. The goal is to reduce the incidence of fake GST invoices and ensure that the GST system is fair and transparent. The government is also working on improving the GST administration, including the GST network. The government is also working on improving the GST administration, including the GST network.
Serum Institute submits fresh data for Covishield emergency approval.

KAUNA SHARMA

The Serum Institute of India (SII) has submitted additional manufacturing data for Covishield to the government, a move that comes after the US Food and Drug Administration (FDA) last week approved the vaccine for emergency use.

The government has yet to approve Covishield for emergency use.

The move is significant because it paves the way for Covishield to be approved for emergency use in the US, which would pave the way for Covishield to be approved for emergency use in other countries that recognize the FDA's approval as a precursor to their own.

The FDA's approval is a key step in the vaccine's global rollout, as it allows Covishield to be distributed to countries around the world that recognize the FDA's approval as a form of regulatory authorization.

The Serum Institute has been working closely with authorities in India and abroad to ensure that Covishield meets all regulatory requirements for emergency use.

The company has been conducting extensive clinical trials and safety assessments to ensure the vaccine's safety and efficacy.

The new data submitted by Serum Institute will be reviewed by the government to ensure that Covishield meets all regulatory requirements for emergency use in India.

The government has been working closely with Serum Institute to ensure that Covishield is available as soon as possible to meet the country's COVID-19 vaccination drive.

The government has been conducting extensive planning and coordination to ensure that Covishield is available as soon as possible to meet the country's COVID-19 vaccination drive.

In addition to the new data submitted by Serum Institute, the government has also been working closely with other vaccine manufacturers to ensure a robust and sustainable vaccination program.

The government has been conducting extensive planning and coordination to ensure that Covishield is available as soon as possible to meet the country's COVID-19 vaccination drive.

The government has been conducting extensive planning and coordination to ensure that Covishield is available as soon as possible to meet the country's COVID-19 vaccination drive.

The government has been conducting extensive planning and coordination to ensure that Covishield is available as soon as possible to meet the country's COVID-19 vaccination drive.
Roy maier arrested over ‘ bribery scheme’

The Indian Express, Tuesday, December 22, 2020

The arrest of Roy De Jesus, the manager of Maier Bros in Kolkata, follows a raid by CBI officials on the firm’s office in the city’s Salt Lake area.

Aadilt Manufacturing, a family-owned company based in Mumbai, has also come under the scanner.

Maier Bros is a well-known name in the building materials industry, with a wide range of products including tiles, sanitaryware, and paints. The company has a strong presence in the East, especially in Kolkata and the surrounding areas.

The CBI raid was conducted as part of an investigation into allegations of bribery. According to sources, the company was involved in a number of projects, including the construction of residential complexes and commercial buildings.

The investigation has revealed that Maier Bros had been paying bribes to officials to get approvals for the projects. The company had also been involved in other activities, including the supply of substandard materials.

The company has been operating in the East for over 20 years and has a good reputation in the industry. However, the recent allegations have cast a shadow on its image.

CBI officials said they were conducting raids at several locations in the city and had seized documents and electronic devices. They declined to give details of the amount of money involved.

Aadil Manufacturing is a closely held company and its owners have been involved in the building materials industry for over 30 years. The company has a strong presence in the East and has been involved in several high-profile projects.

The CBI raid was conducted on the company’s premises in the city’s Kolkata East area. The company has a number of offices and warehouses in the city and is involved in the supply of building materials.

The investigation has revealed that Aadil Manufacturing had been paying bribes to officials to get approvals for the projects. The company had also been involved in other activities, including the supply of substandard materials.

The investigation is expected to continue for some time, and the company is likely to face legal action if found guilty of the charges.

For more news on the CBI raids, read here.
Volatility is expected to stay high. However, the market is ex- 

progress in economic activity in 

mestic markets on Tuesday. The Sensex 50 gained 453 points, or 1.2 percent, to close at 39,925, while the Nifty, which had closed at 12,501 on Monday, gained 12,953 points, or 1.03 percent. The Sensex climbed on Tuesday, extending losses on 

Monday, indicating a recovery and both 

main indices were higher in the following sessions. 

The IT and pharmaceuticals sectors were especially strong, with the Sensex gaining 138 points on 

Tuesday, reflecting strong buying from tech-heavy 

markets. Apple CEO Tim Cook. 

"Vaccines such as Covaxin that are being developed in India can play a major role in the global vaccine strategy by providing safe, afford- 
able vaccines to the world’s population," he said. "The Centre has been instrumental in ensuring the development and approval of Covaxin, a homegrown vaccine developed by Bharat Biotech & Ocugen. As a vaccine expert, I look forward to it being effective and widely 

available to people around the world.

Buyback offer to open on Dec 29

Gaurav Khullar, executive vice president and head of consumer 

affairs at BHEL, said the company is planning to buy back 

shares worth around Rs 200 crore from the market.

"We are making this offer keeping in mind the 

shareholders' perspective and to enhance the 

value of our equity share for the benefit of our 

stakeholders," he said.

The buyback offer will remain open for a period of 10 days from Dec 29, the company said.

The Sensex, which had closed at 5,578 points on Monday, gained 5,900 points and crossed the 5,800 mark on Tuesday. The Sensex and the Nifty, which had 

closed at 18,125 points on Monday, were up 18,253 points and 18,325 points, respectively, by 12.30 PM.

"It is a welcome move by the government," Gaurav said.

"This buyback offer is an indication of the company's 

confidence in its own business and its 

future prospects. The company is a 

leader in the power sector and has a strong 

track record of delivering projects on time and within budget,

"It will help to reduce the free-floating of the shares and 

increase the liquidity in the market," he said.
