THIS REPUBLIC DAY, RADICO KHAITAN SALUTES OUR ARMED FORCES, THEIR SACRIFICES, THEIR VALOUR AND THEIR SPIRIT OF VICTORY

When Pakistan threatened India in the summer of 1965, we fought back. Around 55000 Pakistani soldiers crossed over to the Indian side of the Line of Control (LoC), dressed as locals. Their efforts were thwarted by the superior Indian forces resulting in a decisive victory for India.

Pakistan, under Operation Cheongle Khan, launched 500 sorties in a 25-hour period against Indian air bases. It was a major setback for India but turned the tide in India's favour. In just 15 days, the Pakistanis were forced to return to the LoC. This marked the rise of India as a major military power.

It began with the infiltration of 7000 Pakistani troops into Indian territory at strategic locations. In 3 months, the Indian Armed Forces hadl eved Pakistanis intruders and successfully recaptured the Tiger Hill and other posts as part of Operation Vijay.

Many sacrifices were made by our brave soldiers during these wars; we deeply respect their courage and inherent spirit of brotherhood. They have instilled a sense of pride, honour and glory in each of us.

HOONOURING THE MARTYRS & WAR WIDOWS, AND THANKING ALL OUR SOLDIERS FOR ALWAYS SAFEGUARDING US & OUR MOTHERLAND

The pride of our nation

Corona warriors, Sanitation workers, Soldiers and Farmers!

DEMOCRACY IN THE 21ST CENTURY

The contemporary world is torn between the will of the majority and the rights of the minority. There are two main approaches to democracy. The first approach is based on the principle that the majority should rule. This approach is often referred to as majority rule democracy. The second approach is based on the principle that all voices should be heard. This approach is often referred to as participatory democracy.

Both approaches have their strengths and weaknesses. Majority rule democracy can lead to rapid decision-making and can be more efficient. However, it can also lead to the suppression of minority views and can be undemocratic. Participatory democracy can ensure that all voices are heard, but it can be slow and can be susceptible to manipulation.

The challenge is to find a balance between these two approaches. The ideal democracy should be one where the majority’s will is respected, but minority views are also taken into account. This balance can be achieved through inclusive decision-making processes and by creating spaces for dialogue and debate.

In conclusion, the contemporary world is torn between the will of the majority and the rights of the minority. Both approaches have their strengths and weaknesses. The challenge is to find a balance between these two approaches and to create a democracy that respects all voices and ensures that all individuals are included.

What to look for in an upcoming Budget

The Indian express

TUESDAY, JANUARY 26, 2021

More than a month has passed since the last Budget, but the economic landscape has changed dramatically since then. A deadly second wave of the pandemic has hit the country, and while the vaccination drive has been successful, the need for fiscal stimulus and spending cannot be ignored. On February 1, Finance Minister Nirmala Sitharaman will present what could turn out to be India’s most consequential Budget in years. What should you look for in the Budget – and what should the Budget be looking at?

Ahead of the Budget, what is the state of the economy? The recent Budgets revealed that the government was working towards fiscal consolidation in the medium term, and the financial system was in a better position to deal with the pandemic. However, the government has been forced to allocate additional resources to deal with the crisis. The fiscal deficit, already high, will likely deteriorate further, and the government will need to cut expenditure in non-essential areas to bring the deficit under control. The government will likely announce a fiscal package to support the economy in the Budget.

What is the status of the post-Covid recovery process, and what are the concerns going forward? The recovery has been uneven, and while some sectors have shown signs of recovery, others, like the services sector, have struggled. The government needs to focus on the non-fiscal reforms to support the recovery. The Budget should also focus on the medium-term goals, such as the expansion of the tax base and the reduction of the fiscal deficit.

What should you look for in the Budget – and what should the Budget be looking at? The Budget should focus on the medium-term goals, such as the expansion of the tax base and the reduction of the fiscal deficit.
This year we have gone through many ups and downs. To looking back at Subhash Chandra Bose’s vision for the nation governance, he believed it was necessary that to make India a more egalitarian society.
