Aim to capture interest rates for the long term

Nippon India Nivesh Lakshya Fund
(An open ended debt scheme investing in instruments such that the Macaulay duration of the portfolio is greater than 7 years)

Aim to enjoy long term benefits of investing in pure debt & money market instruments including Government Securities, in a tax-efficient manner**, with no lock-in period!

So go ahead and seize the opportunity TODAY!

For more information contact your Mutual Fund distributor or visit https://mf.nipponindiaim.com

Nippon India Nivesh Lakshya Fund
(An open ended debt scheme investing in instruments such that the Macaulay duration of the portfolio is greater than 7 years)

This product is suitable for investors who are seeking*:
• Income over long term.
• Investment in Debt and Money Market Instruments with portfolio Macaulay Duration of greater than 7 years.
*Investors should consult their financial advisors if in doubt about whether the product is suitable for them.

**Sale of units after 36 Months of purchases entitles investor to avail indexation benefit for other than equity oriented scheme. Long term Capital gain and short term capital gain Tax is applicable on redemption based on period of holding.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
In fantasy games surge, policy plays catch-up with reality

In ordinary crime, it can kill people, farmer unions and the Centre on.

Against stone-pelters in Jammu, a clash between two sets of men.

A senior official of the Centre for the Times of India, that is not in touch with anyone, has been found dead.

Online Fantasy Sports Platforms (OFSPs) with a set of initiatives:

"Legislative safe harbour," "light-touch regulation," and "improved enforcement mechanisms." These initiatives are aimed at creating a balance between the growth of the sector and the need for regulatory oversight. The OFSPs are seeking to work with the Indian government to formalize the regulation of their industry.

In fantasy games surge, policy plays catch-up with reality.

The Indian government has been looking to regulate OFSPs for some time, with various stakeholders voicing concerns about the potential for addiction and unfair advantage in these games. The Indian Express has reported that the Centre is considering a "light-touch" approach, similar to that used in the United Kingdom, where OFSPs are licensed and regulated.

The Centre has stated that it is considering a "light-touch" approach to regulate OFSPs, which would involve creating a regulatory framework that is less intrusive and more focused on ensuring that OFSPs operate within legal and ethical boundaries.

In 2021, the Centre is expected to finalize regulations for OFSPs. The regulations are expected to include provisions for licensing, monitoring, and enforcement, as well as measures to protect consumers.

In November, the Centre announced that it was considering a "light-touch" approach to regulate OFSPs. This approach would involve creating a regulatory framework that is less intrusive and more focused on ensuring that OFSPs operate within legal and ethical boundaries.

**Coimbatore**

India’s National Institute of Immunology (NII) confirmed on February 2 that the two Covid-19 vaccines—SII’s Bharat Biotech and Bharat Biotech’s Covaxin—were granted “emergency use approval” by the Drug Controller General of India (DCGI) on February 2.

In a statement, India’s Ministry of Health and Family Welfare said it was "clearing Covaxin into the grant of emergency use approval in the UK, in form used for traditional vaccines in clinical trial mode, so that there is no delay in the process of recruiting and enrolling patients in the Phase III trials of Covaxin in the UK. The Phase III trials of Covaxin have received at least one dose of the drug from all the 200 participants of the UK’s volunteer group. These records will be submitted to the UK government. The UK government will then take a decision to grant emergency use approval in the UK. The process will only begin after Covaxin is granted emergency use approval in India. Covaxin will be ready for large-scale administration by the end of May, which is what my understanding is after talking to SII’s chairman. SII is making Covishield, Bharat Biotech is making Covaxin. This approval ensures that we are not at a disadvantage compared to other countries..."

Dr. Guleria: “This is like aquick fix... It’s like a band-aid. It’s like a stopgap measure... But we claim that Covishield is ready for large-scale administration by the end of May, which is what my understanding is after talking to SII’s chairman. SII is making Covishield, Bharat Biotech is making Covaxin. This approval ensures that we are not at a disadvantage compared to other countries...”

The Met centre in Mumbai seeks to boost rain gauge network

The RCCD RECON Metrological Centre (RMC) in Mumbai has taken a decision to bring in rain gauge equipment as many stations are using old and non-functional gauges.

The RMC, which takes over from the IMD in Mumbai and the State Disaster Management Authority, is looking at increasing the number of automatic gauges.

"We will install 20 ARGs, of the Indian Meteorological Department (IMD) with automatic transmission devices," said a senior official. "The system was able to monitor rainfall and send data to the IMD."

The official also said that the RMC would upgrade the existing automated network, which includes the BMC’s in-house network.

The RMC was formed in May 2021, with the merger of the BMC’s in-house network and the IMD’s Met Centre in Mumbai. The network is currently made up of 500 gauges, of which 300 are operational. The RMC plans to strengthen its existing capacity in the coming months.

"We have taken over the IMD’s infrastructure, the network of 300 gauges and the data transmission system," the official said.

"We have plans to improve the coverage of the network and the accuracy of rainfall data."

The BMC already had an automated network, but the RMC is looking to increase its capacity to 1,000 gauges, of which 400 will be upgraded.

"The RMC will work closely with the BMC to improve the network and increase the capacity," the official said.

The RMC also plans to work with the IMD to improve the accuracy of rainfall data and to better understand the rainfall patterns in the region.

"We are looking at improving the accuracy of rainfall data by working with the IMD," the official said.

"We are also looking at improving the coverage of the network to better understand the rainfall patterns in the region."

The RMC plans to work with the BMC to improve the network and increase the capacity, and to work with the IMD to improve the accuracy of rainfall data and to better understand the rainfall patterns in the region.

The RMC also plans to work with the IMD to improve the accuracy of rainfall data and to better understand the rainfall patterns in the region.

"We are looking at improving the accuracy of rainfall data by working with the IMD," the official said.

MAHARASHTRA, Maha Vikas Aghadi (MVA) Senior Congress leader Ajit Pawar has applied for the post of Chairman of the Maharashtra Development Corporation (MDC), which is in-charge of the state's waterworks department, to the Maharashtra government. The MDC board has been under a cloud following charges of financial irregularities.

POLITICALE

The government is in a dilemma about the future of the MDC. The government has not yet decided whether to retain the MDC as a separate body or merge it with the Water and Environment Department. The government is trying to decide on this issue before the next fiscal year begins on April 1.

**INTERVIEW: PRITHIVI SATHE**

‘Congress not trying to weaken MVA govt... we have some issues which will be resolved’

Prithvi Sathe, general secretary of Maharashtra Congress Committee, has been pressurised by the Congress for a full-time national president. Sathe said he would not contest for the post as he is already a full-time national president. However, Sathe said he would support the Congress for the post of full-time national president in the future.

When will the Congress get a full-time national president? That process is on the way. We have already received the NCP's list of candidates and are discussing it with the NCP. We have also received the list of candidates from the JD(S) and the BJP. We have not received any list from the Congress yet.

Will Congress, NCP and Shiv Sena fight polls together? We have not received any list from the Congress yet. We will take a decision on the matter after receiving the list.

**NEW DELHI**

BJP President JP Nadda and Punjab CM Amarinder Singh have been hot topics on social media, with the latter making a move to strengthen his party's position in the state.

Amarinder announced that he would enter the fray in the upcoming elections, which are expected to be held before the end of the year, in a statement on Monday.

The move is likely to unsettle Congress, which has been trying to improve its performance in rural areas.

The announcement came after a meeting with Nadda in New Delhi on Monday.

Amarinder, who hails from the state, has been a key figure in the party's efforts to win power in Delhi.

His decision is likely to be welcomed by the ruling party, which has been facing criticism for its performance in the state.

Amarinder has been a vocal critic of the Centre's policies, particularly its handling of the COVID-19 pandemic and its implementation of the farm laws.

The move is also likely to be seen as a sign of the party's determination to strengthen its position in the state.

The move is also likely to be seen as a sign of the party's determination to strengthen its position in the state.

Amarinder's decision is likely to be welcomed by the ruling party, which has been facing criticism for its performance in the state.

Amarinder has been a vocal critic of the Centre's policies, particularly its handling of the COVID-19 pandemic and its implementation of the farm laws.

The move is also likely to be seen as a sign of the party's determination to strengthen its position in the state.
The Union minister talks about measures to boost electric vehicle production, assures government support to lockdown-battered MSME sector, says the government has taken several steps for benefit of farmers, and lays out details of a multi-modal hub in Nagpur. The session was moderated by Senior Assistant Editor Avishek GDastidar.

NITIN GADKARI, Minister for Road Transport, Highways, and MSME

Root cause of the problem is surplus foodgrains and higher MSP than the market price.

The Indian minister mentions that measures to boost electric vehicle production, assures government support to lockdown-battered MSME sector, says the government has taken several steps for benefit of farmers, and lays out details of a multi-modal hub in Nagpur. The session was moderated by Senior Assistant Editor Avishek GDastidar.
WHILE parliament has been discussing a post-pandemic strategy, the Congress has been moving cautiously in its strategy for the post-Covid-19 world. It has already been active in attracting the support of the NCP, which was the first move. The Congress is now focusing on the Indian states to gauge the mood of the people. It has already won the Assembly elections in Tamil Nadu and is preparing to contest the elections in Kerala. The Congress is also gearing up for the Assembly elections in West Bengal.

In Tamil Nadu, the Congress has been working hard to win the support of the voters. The party has been focusing on the issues of education, health, and jobs. It has also been trying to attract the support of the Dalit and OBC communities. The Congress has been active in organizing rallies and public meetings in the state. The party has also been trying to strengthen its organizational structure in the state.

In Kerala, the Congress has been focusing on the issues of education, health, and jobs. The party has been active in organizing rallies and public meetings in the state. The Congress has also been trying to strengthen its organizational structure in the state. The party has been working hard to attract the support of the Dalit and OBC communities.

In West Bengal, the Congress has been focusing on the issues of education, health, and jobs. The party has been active in organizing rallies and public meetings in the state. The Congress has also been working hard to attract the support of the Dalit and OBC communities.

In conclusion, the Congress is actively working to win the support of the people in the Indian states. The party is focusing on the issues of education, health, and jobs. The Congress is also working hard to strengthen its organizational structure in the Indian states. The party is working hard to attract the support of the Dalit and OBC communities.
The health authorities will need to remain alert to such possibilities. A country againstanotoriously unpredictable virus could throw up unforeseen challenges. Their immunogenicity could vary, and adverse effects might need to be understood differently. The regulator pointed out, the approvals were expedited in view of the public health need. The government has begun registering the first list of beneficiaries. In the coming months, the ratio of vaccine recipients to the eligible population will be increased accordingly and vaccinators educated on the finer details of the two vaccines. The country is attempting to inoculate more than a fourth of its total population. One, these are people who are already familiar with the issues and problems at the grassroots level; two, access to the state machinery has implications for grassroots democracy and politics in the state whereas semesters, workers, among them 140 women. This record number of MGNREGS workers entering local bodies is a significant achievement. In short, a public welfare instrument, often ridiculed as a symbol of state failure in delivering on its mandate, has shown the way to the quality. He has contrasted the disas- trous management of the pandemic by the government, which never went beyond tokenism, is what the New Dalit wants and the Congress never went beyond tokenism. The vision of New India will be completed by the end of the decade. The pandemic, lockdown and the economic crisis have forced a large number of people, particularly workers, to think about work for the first time. The pandemic has brought about a sea change in the lives of the workers, among them 58 women. This record number of MGNREGS workers entering local bodies is a significant achievement. In short, a public welfare instrument, often ridiculed as a symbol of state failure in delivering on its mandate, has shown the way. The PM has visited the private company and its model is for the vision of New India. The government is committed to the development of the country, and the government is committed to the development of the country, and the government is committed to the development of the country, and the government is committed to the development of the country.
Government must constitute a parliamentary committee with military advisers to oversee and guide transformational military reforms initiated a year ago.

In India, while the peacetime management of the military consists of the service Chiefs, the Theatre Commanders and the Commander in Chief of Defences, the chain of command runs from the President to the Secretary (Minister) of Defence and then, directly to the Theatre Commanders. Asahighlycovetedresource, landis thebasisofmaintainingthecasteorclassstructure.Althoughitmayseemtohavebeenplacedonapiecemealbasis, this has always come from the PM. However, in the system of higher defence under operation, ideally, the Rakhela (Chief of the Staff) of the Theatre Commanders, working with the strategic advice of the Defence Secretary, should ensure that the chain of command runs perfectly. This would protect the system from corruption and would not allow uncoordinated attempts to dominate the military. The denouement comes in the form of political and policy decisions, and this should be done by the most sound assumptions and, even if feasible, the first is likely to happen while, the second will degrade the military's combat capability in today's technology-intensive battlespace.

In India, while the peacetime management of the military consists of the service Chiefs, the Theatre Commanders and the Commander in Chief of Defences, the chain of command runs from the President to the Secretary (Minister) of Defence and then, directly to the Theatre Commanders. As a highly coveted resource, land is the basis of maintaining the caste or class structure. Although it may seem to have been placed on a piecemeal basis, this has always come from the PM. However, in the system of higher defence under operation, ideally, the Rakhela (Chief of the Staff) of the Theatre Commanders, working with the strategic advice of the Defence Secretary, should ensure that the chain of command runs perfectly. This would protect the system from corruption and would not allow uncoordinated attempts to dominate the military. This would protect the system from corruption and would not allow uncoordinated attempts to dominate the military. The denouement comes in the form of political and policy decisions, and this should be done by the most sound assumptions and, even if feasible, the first is likely to happen while, the second will degrade the military's combat capability in today's technology-intensive battlespace.

The system of Theatre Commanders must, obviously, be based on country-specific requirements that will emerge out of the chain of command and the Theatre Commanders of Defences. The chain of command, the theatre of operations and the nature of mission/operations vary from state to state. The chain of command remains consistent with the principal military advisers to the President.

As such it may sound the omen for ensuring gains to fund defence expenditure saved. The Ordinance also has the dual purpose of stopping the DMA, which has floated two schemes aimed at reducing the defence prisoners' bill. One penalises soldiers for civilians while releasing army service from, and another one to encourage a year's loan for juveniles. Both programs are based on sound assumptions and, even if possible, the first is likely to happen while, the second will degrade the military's combat capability in today's technology-intensive battlespace.

A monster wind turbine in Rotterdam is upending an industry

The turning diameter of the Dafnus-X rotor is longer than any other wind rotor in the world and is being tested in Rotterdam. It is designed to generate more power and reduce the impact on the environment. The turbine is being manufactured by the Dutch company Vestas, which is a leading manufacturer in the wind energy industry. The turbine is expected to be operational by 2023 and will be used to provide renewable energy to the local community. The turbine is designed to be more efficient and reliable than previous models, and it is expected to reduce the cost of energy production.
Several aspects being tracked by industry

- A CONSPIRACY in which OPEC+ (including Russia) is being accused of not adhering to their production cuts, which could result in a surplus in the market.
- The Doha减产协议 has been extended again, with OPEC+ producers agreeing to cut production by 9.7 million barrels per day (b/d) through the first quarter of 2021.
- There is a sense of unease among observers as to whether the producers are really committed to the deal or if they are using it as a means to grab market share.
- There are concerns that if OPEC+ does not adhere to the agreement, it could lead to an oil glut and lower prices.

Despite Covid, negative GDP growth, forex reserves soar $100 bn in Apr-Dec

Set to cross all-time high

India’s foreign exchange reserves surged to a record high of $540 billion in December, as the central bank continued to intervene in the market to support the rupee.

The Reserve Bank of India (RBI) on Thursday said its foreign exchange reserves increased by $4.3 billion to $540.1 billion as on December 31, 2020 from $535.8 billion on December 24.

The cumulative increase in the RBI’s forex reserves this year was $100 billion, taking the total to $272 billion.

The Ministry of Finance said in a statement that the cumulative increase in the forex reserves was $62 billion in 2019-20 and $102 billion in 2018-19.

The government has been trying to build up forex reserves to contain the impact of the coronavirus pandemic and the global economic crisis.

The rupee had plunged to a record low of 77.60 on March 23, but it has since recovered and is currently trading at 73.48 against the US dollar.

The rising reserves are seen as a sign of confidence in the economy, as investors are confident that the government will be able to manage the pandemic and the economic crisis.

Gupta puts BHEL on the block

The government’s strategic disinvestment in the state-owned power utility, Bharat Heavy Electricals Limited (BHEL), is set to witness a fresh round of bidding.

Finance Secretary Ajay Bhushan Pandey on Thursday said the government will conduct a fresh round of bidding for BHEL after the current round of bidding is completed.

The government had planned to sell a 10% stake in BHEL in the current fiscal year but the process was put on hold due to the Covid-19 pandemic.

The government has not yet announced the quantum of stake to be sold and the terms of the offer.

The BHEL stake sale process had been postponed several times due to the Covid-19 pandemic and the economic crisis.

The government is expected to sell a 10% stake in BHEL for about $2 billion.

The BHEL stake sale process has been completed in some other countries, such as the US and the UK, and the government is expected to follow a similar approach.

The BHEL stake sale process will be completed in the current fiscal year.
**BRIEFLY**

Jahangir Khan Tareen (TDP) has been appointed the new governor of Punjab, replacing Malik Ismail. The decision was announced on Monday by the provincial assembly. Tareen's appointment comes amid political turbulence in the province, with the outgoing governor's term expiring on June 15. Tareen has been a long-time member of the Pakistan Muslim League-Nawaz and was a senior cabinet minister in the Punjab government. He is known for his controversial statements and has been involved in several political controversies in the past.

**Brisbane Test on schedule**

Player wary of strict lockdown but top official says will travel to Queensland for final Test

VIRAL MENGON (JANUARY 2, 2023)

The Brisbane Test, the fourth and final of the four-match Test series, to be played from January 13 to 17 at the Gabba, has been confirmed by the ICC (International Cricket Council).

As the players prepare to board the flight to Brisbane for the Test series, the mood among the Indian players and officials is upbeat. The team, led by Virat Kohli, is looking forward to the challenge of playing in the subcontinent and aiming to clinch the series against England.
