Aim to capture interest rates for the long term

Nippon India Nivesh Lakshya Fund
(An open ended debt scheme investing in instruments such that the Macaulay duration of the portfolio is greater than 7 years)

Aim to enjoy long term benefits of investing in pure debt & money market instruments including Government Securities, in a tax-efficient manner**, with no lock-in period!

So go ahead and seize the opportunity TODAY!

For more information contact your Mutual Fund distributor or visit https://mf.nipponindiaim.com

This product is suitable for investors who are seeking*:
- Income over long term.
- Investment in Debt and Money Market Instruments with portfolio Macaulay Duration of greater than 7 years.
*Investors should consult their financial advisors if in doubt about whether the product is suitable for them.

**Sale of units after 36 Months of purchases entitles investor to avail Indexation benefit for other than equity oriented scheme. Long term Capital gain and short term capital gain Tax is applicable on redemption based on period of holding.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
Mothers on floors above, 10 babies killed in hospital fire
7 rescued; dead between the ages of 3 days and 2 months

CM orders probe in fire incident, Fadnavis says case of culpable homicide

Latest hospital fire
The Bhandara hospital in Maharashtra’s Nagpur district, about 280 km from the state capital, was hit by a devastating blaze on Saturday, killing 10 babies and injuring 10 others.

Neonatal unit cleared without fire audit, appeal for equipment pending

TALABUSAM BARNAGARWALA
BHANDARA (MAHARASHTRA), January 9:
The Bhandara District Administration has cleared the hospital for failing to conduct a fire audit and appeal for equipment pending.

Bhandara district authorities had sent a proposal to the state government for a fire audit and equipment pending.

An infant care unit at the Bhandara Government Medical College Hospital, where the babies died, said the hospital had conducted a fire audit and appeal for equipment pending.

For a while, the family decided that nothing could be done to help the infant, but then their hope was rekindled.

A few days ago, the family had sent a letter to the hospital authorities, saying that the infant was suffering from a severe throat infection.

In the past, the family had visited many hospitals, including the government hospital in Bhandara, but the baby’s condition had not improved.

Jan 16 is Vaccination Day One

A historic day of vaccination against COVID-19 was made in a haphazard manner with various problems, including lack of vaccines and staff. The government has promised to continue vaccinating all eligible citizens.

CM orders probe

While the government has been conducting the exercise, the Guwahati police has been investigating the incident. The state government has announced that a probe will be conducted to find out what happened.

School murder

A school principal in Uttar Pradesh was reportedly killed by his own students.

HC directs state to decide on continuing quasi-judicial virtual hearings post pandemic

OMKAR GODHLE
Special correspondent

MUMBAI, January 9: The Bombay High Court has directed the Maharashtra government to take a decision on conducting quasi-judicial virtual hearings across the state within the public hearing deadline of November 23, which has been extended to December 31. The court has admitted an application for interim relief and decided to hear the matter on January 12.

The petition was filed by Advocate General Ashutosh K. Galla against the process initiated by the government of Maharashtra to conduct quasi-judicial virtual hearings in municipal corporations through video conferencing, which was initiated by the government on November 23.

The petitioner had approached the court for an order regarding the process and had requested that the government consider virtual hearings in municipal corporations.

The court had earlier asked the petitioner to file a written affidavit detailing the reasons for the application, which was submitted on November 24.

The court had noted that the government had initiated the process to conduct quasi-judicial virtual hearings in municipal corporations through video conferencing to ensure the public hearing deadline of November 23.

The court had also noted that the government had received objections from various quarters, including the Maharashtra Bar Association, the Centre for Law and Education, and the Maharashtra$total government.

The court had stated that the objections were valid and had directed the government to consider the objections and take a decision on the matter.

The court had also noted that the government had already conducted quasi-judicial virtual hearings in municipal corporations through video conferencing, which had been initiated on November 23.

The court had further noted that the government had received objections from various quarters, including the Maharashtra Bar Association, the Centre for Law and Education, and the Maharashtra$total government.

The court had stated that the objections were valid and had directed the government to consider the objections and take a decision on the matter.

The court had also noted that the government had already conducted quasi-judicial virtual hearings in municipal corporations through video conferencing, which had been initiated on November 23.

The court had further noted that the government had received objections from various quarters, including the Maharashtra Bar Association, the Centre for Law and Education, and the Maharashtra$total government.

Bareilly district hospital, Subodh, the district superintendent, said that the condition of the girl kept worsening and she was unconscious. According to police, the girl was brought in a state of unconsciousness by her parents to the district hospital, where she was put on a ventilator. A police officer said that a postmortem examination would be carried out to determine the cause of death. They added that a probe into the incident was being conducted.

In the past, similar cases have been reported in other parts of the country, including Uttar Pradesh and Rajasthan. Police have been asked to ensure that such incidents do not recur.

**In the case of Netaji:***

India celebrated the 125th birth anniversary of Netaji Subhas Chandra Bose on January 23, 2021. The celebration included various events across the country to honor the legacy of the freedom fighter.

Prime Minister Narendra Modi and other ministers, including those from other political parties, attended the event. The event was marked by various speeches and the release of books on Bose's life and work.

**In the case of Covid-19:***

The Indian government has been working to contain the spread of Covid-19, which has caused over 400,000 deaths and over 10 million cases in India. The government has implemented various measures, including lockdowns and vaccination drives, to control the pandemic.

**In the case of Bird Flu:***

The bird flu outbreak has affected several states in India, including Uttar Pradesh, where the first case was reported in February 2021. The government has been working to contain the spread of the disease, including by implementing strict biocontainment measures and by testing poultry for the virus.
Fourth suicide at protest as farmer consumes poison

RAAKHI JAGGIA

A 39-YEAR-OLD farmer has allegedly committed suicide at the Singhu border on Saturday— the fourth person to do so in a week— where he was living permanently parked there. His body will be handed over to the police at the protest site.

Hehardly had any farmincome, said Amrinder Singh, who had come to him in a mobile hospital, where he was admitted. He was living in the village home. As he had been living in Singhu for more than a year, the doctors were in nearly every village. His mobile number was 9999999999.

Amrinder Singh allegedly says this is the second suicide at Singhu border on Saturday— the fourth person to do so in a week— where he was living permanently parked there. His body will be handed over to the police at the protest site.

Amrinder Singh had welcomed the farmers’ agitation at Singhu border. He said the farmers were living in the village home. As he had been living in Singhu for more than a year, the doctors were in nearly every village. His mobile number was 9999999999.

When the Indian government looked for a partner to produce a legendary coronavirus vaccine, Bharat Biotech was the natural contender. From Rotavirus to Hepatitis B vaccines and now Covaxin, AMITABH SINHA shows how a small Hyderabad firm, dreaming big and risking high stakes, has emerged as one of India’s biggest biotech success stories.

**The Journey**

98 Bharat Biotech set up
99 First vaccine, for Hepatitis B
2000 Rabies vaccine is in use
2007 Influenza vaccine is developed

**INDISPENSABLE VACCINES**

Several companies, such as Genetech, have gone from emergency use to licensed production.

**The Challenges**

2015: One single-dose intranasal vaccine with emergency use authorization, Bharat Biotech developed the vaccine.

**The Innovators**

Subramanian Swamy, the minister for health and family welfare, has been a strong supporter of Bharat Biotech.

**The Triumph**

2006: Bharat Biotech was one of the first companies to produce and sell a vaccine.

**The Breakthrough**

1999: After the vaccine, the team worked on multiple ways to improve its quality.

**The Innovation**

2015: Bharat Biotech set up a new company, BioVet, which produces vaccines for livestock.

**The Future**

Bharat Biotech is working on a new vaccine for COVID-19.

**The Impact**

Bharat Biotech has played a crucial role in the Indian healthcare sector.

**The Lessons**

From the early days, Bharat Biotech emphasized the importance of innovation and collaboration.

**The Vision**

Bharat Biotech aims to be a global leader in the biotech industry.

**The Success**

Bharat Biotech is one of the largest biotech companies in India.

**The Legacy**

Bharat Biotech has set a precedent for other companies to follow.

**The Outlook**

Bharat Biotech is working on a new vaccine for COVID-19.
We should collectively hope that Phase III clinical trials by the end of the year will yield results that will be evaluated by March. Thereafter, we can ask to open up India in two waves—that is, to open up the two waves will not come—may also expect it will work. It is a great mistake to think that we can achieve something until we have achieved this. To see the harvest of our labors, we must have patience. It is a mistake to think that we can grow into larger beings. Seeing one, you felt the safest. An ancient Russian author noted that "Shantiniketan is still a place for me."

Shantiniketan: Making of a university town

A view of the area around Shantiniketan, by Chitradasa Bandyopadhyay

In 1863 that Mahatma Deendayal Sethur, the father of Rabindranath Tagore, purchased 20 bighas of land near the Ganges to found Shantiniketan, a city dedicated to the arts and sciences. Shantiniketan was known as the abode for those who aspired to truth and freedom and could not reconcile the conflict between the old traditions and the new culture. This is how the Bengal Renaissance began. Tagore established a school to teach the children of rural Bengal, the school was started with five students. These included his eldest son Rathindranath Thakur and his brother's son, Visva-Bharati. The school was named after his father, Swami Debendranath Tagore.

Tagore also established a university in 1915, Shantiniketan was the first university in India. The university was established with five students. These included his eldest son Rathindranath Thakur and his brother's son, Visva-Bharati. The school was named after his father, Swami Debendranath Tagore.

In 1915, Rabindranath Tagore was awarded the Nobel Prize in Literature. This recognition brought Shantiniketan to the attention of the world. The university continued to flourish under Tagore's leadership until 1948, when it was merged with the existing education system of West Bengal.

Shantiniketan remains a symbol of the Bengal Renaissance and a testament to Tagore's ideal of education that is both practical and ideological. The university continues to thrive and inspire generations of students from around the world.

In times of unusual stress, such as the ongoing COVID-19 pandemic, we often seek solace in food that is familiar and nourishing. What is it that makes certain kinds of food more appealing than others in times of unease?

JULIA CARMIGNEX  

Des Moines Register  

The word “comfort” is the key to understanding what drives people to eat certain foods during times of stress, as has been widely experienced during the pandemic. For some, comfort food is a familiar meal that reminds them of childhood home-cooking. For others, it might be a childhood memory of being comforted by a special treat or confection. But what is it that makes certain kinds of food more appealing than others in times of unease?

**SOUL CURRY**  

The most interesting thing about comfort food, and what makes it so appealing, is that it’s not just about the food itself. It’s about the emotional and social needs that it fulfills. In a 2008 paper by American psychologists Joyce A. Conca and Bonnie J. Spring, two-week studies conducted “supported the existence of a carbohydrate-cravings syndrome in which carbohydrate self-administration improves psychological mood.” The study found that people who were told they had to eat a high-carbohydrate diet reported feeling better.

One reason foods linked to stress are so effective at helping us cope is that carbohydrates can help increase the availability of certain brain chemicals, which control emotions (serotonin, dopamine). Niacin, a vitamin essential for the conversion of the niacinergic neurotransmitter, which helps in regulating mood and behavior, is present in carbohydrates. Carbohydrates also help improve neural function.

But comfort food is not just about sugar and calories. It’s about the memories and experiences that certain foods evoke. The way certain foods are associated with certain times of the year or events in our lives. It’s about the comfort and joy that certain foods can bring.

Recently, a study conducted in 2020 found that people who consumed comfort foods during the pandemic reported feeling happier and less stressed. The study, which involved 2,000 people, found that comfort foods were associated with improved mood and reduced anxiety.

Similarly, a Canadian study, led by neuroscientist Melissa Maloney, on “comfort baking” phenomena revealed that one of the preferred strategies for coping with reduced social and physical need of stress was to “bake.” In a study of 60 people, it was found that baking led to a reduction in stress and feelings of loneliness.

Research has also shown that comfort foods can help regulate mood and stress levels. In a study published in the journal *Psychoneuroendocrinology*, researchers found that consuming comfort foods led to increases in the hormone oxytocin, which is associated with feelings of happiness and bonding.

But comfort food is not just for adults. Children also experience comfort in the form of certain foods. In a study conducted in 2019, researchers found that children who were given comfort foods such as chocolate and ice cream reported feeling happier and more satisfied.

Comfort food is a universal phenomenon. It’s not just about the food itself. It’s about the memories and experiences that certain foods evoke. It’s about the comfort and joy that certain foods can bring.

Deadly Deception  

As a film on a case that shocked Kerala and a killer who was never caught is recounted, former investigators recount a more brutal reality.
Postcards from the Past

From a chaotic media to a unified system, the post office was important for intelligence gathering and services of mail and money.
Nearly four decades ago, a quick-fix murder and its daredevil perpetrator stunned Kerala. With a new film coming up on the criminal mastermind who was never apprehended, former police officers recount a murder most foul.

Vishnu Vinjam

Deadly Deception

A 30-YEAR-old, running afternoon, April 17, 1924, saw Balakrishna Menon, a police inspector in Kerala's capital, turn a man on his side in a hospital bed. Menon had been informed that the man, a sub-caste of the Nair community in Kerala, had been beaten to death by members of his community. When the police arrived on the scene, they found that the man had been beaten to a pulp and then thrown into a well. The police suspected that the man was a suspect in a robbery case and that the community had retaliated.

As the police investigated the crime, they discovered that the man had been a key figure in a criminal gang that had been operating in the area. The gang was known for its ruthless tactics and had been involved in several robberies and assaults.

The police quickly arrested several members of the gang, but the leader, a senior member of the community, managed to escape. The police then started a manhunt for the leader, but he remained elusive.

The investigation dragged on for several months, and the police were unable to find any solid evidence against the leader. However, they did discover that the leader had connections with several influential people in the community, and they believed that he was using his influence to evade capture.

Despite the obstacles, the police continued to investigate the case, and eventually they were able to gather enough evidence to charge the leader with murder and other crimes. The leader was arrested, and he was eventually convicted of all charges.

The case became a symbol of the power of organized crime in Kerala and highlighted the challenges faced by law enforcement in the state. It also brought attention to the issue of gang violence and the need for stronger measures to combat it.

In the years since, the case has been a source of fascination, with many book and film adaptations being made about it. It has also become a symbol of the importance of justice and the need for law enforcement to be able to effectively investigate and prosecute such crimes.

But the case also serves as a reminder of the challenges faced by law enforcement in Kerala and the need for stronger measures to combat gang violence and other forms of organized crime.

The case of the 30-year-old man has become a cautionary tale, with many law enforcement officials and community leaders calling for stronger measures to combat organized crime and gang violence in the state.
East Bengal beat BFC, extend unbeaten run

Alen: Alen Smrekar’s first-half mauling against Railways didn’t shift to East Bengal beating FC 1-0 in their second round of the Indian Super League here on Saturday. The defending champions were unfazed by a match-end goal, while BFC continued their poor start in the tournament. East Bengal have scored 22 points from 17 matches while BFC have 11 from 18.

Sporting beat debutants Sudeva

Delhi: Sporting East Bengal struggled in the third round of ISL, but they helped promoted Mumbaikar Sudeva endure an emotional rollercoaster. The two sides drew 2-2 in the third round of ISL, while Sudeva defeated East Bengal 2-1 in their second round.

Thapar University: Thapar University defeated the debutants of the new Strikers League in the opening game of the new season. This was a good start for the new team, who showed their ability to compete with the established teams in the league.

Delhi: The Delhi Police Football Association (DPLFA) Women’s Inter-District League 2021-22 was held on Saturday. Indian Army and Delhi Police Women’s Police FC won their respective matches.

SANDS

ATHFNS 98

He is likely to be out of the India game, but not before the SCG Test.

The precipitant of a collapse was Pat Cummins who bowled with a pace that is more than adequate and then decreased them with lengths that he throws at them, showing a dose of mastery on seam movement and execution. He gave no room and showed that he had a sharp, strong and focused mind on the action with the Indians suffering a lot, especially in the last session on the second day at SCG.

With series on line, how can themselves out

Pat Cummins took four Indian сразу after the turn as the match in Australia’s favour

In Cummins, Pujara had found his one-upmanship over India’s defensive rock. The "best ball has faced this series," Pujara would later say.

Growing up in the Sydney suburbs of Parramatta, Cummins showed the all-rounder in him, and the fast bowler in him. He had a burning desire to prove himself, and a fierce determination to get back to his best. That’s how he did it, and that’s how he keeps getting better.

In the morning, Cummins had out-bowled Cummins. The quicks are Cummins’ best friends. The ball is Cummins’ best weapon.

Pujara, with an equally spaced piece of bowling, Rahan was stifled up with a sphere of short ball at a历史性. He was caught unaware with a ball that made him look silly. The ball that jagged back sharply into him.

The ball had trapped him for room, but no one had imagined the pressure on the boundary off the seam movement. The short ball turned it deep off the square of. Pant was settled at the middle of his swing, but it was central to their third-day dominance. It was a very good opportunity to cut the opening breather of a second phase. It certainly wasn’t a risk, but it was a big blow to Cummins, who had been one of the few players to impress as Australia made 187 for 4 in a memorable innings.

Pujara, who had started off with a couple of boundaries, was bowled by Bumrah, who has been the standout bowler so far in the series. The ball had hit the inside edge of his bat and gone to second slip. Pant was trapped lbw by Ashwin, who had bowled him for a duck.

With 3-4 wickets down, Pant was brought back to the field. The ball turned on him and he was caught at fine leg for 3.

Hindustan Times 06-12-2023

Fors Completely ascertaining the damage to his bowling hand. He is unlikely to bowl in the Australian second innings after being taken off the field by Cummins.

As Josh Hazlewood had him caught behind.

What if the ball hadn’t turned? What if there was no seam movement? What if there was no movement at all? What if Cummins had not been able to bowl that home-breaking delivery? What if Pant had not been caught? What if Ashwin had not bowled him?
